

# SNAP-ON® ASSET MANAGEMENT CERTIFICATION

## BUILDING TOOLS FOR LIFE

Built on the foundation of the most trusted brand in the industry, Snap-on provides the essential **TOOLS FOR LIFE** that shape the future of tomorrow's workforce — certification programs, industry-supported curriculum and hands-on training with Snap-on products.

The Snap-on Asset Management Certification explains the fundamental importance of total asset control consisting of tool control theory and foreign object damage (FOD) prevention.

Asset Management is a vital program for a variety of industries, including aviation, wind energy, nuclear energy facilities, pharmaceuticals and food processing.

Students and technicians who successfully complete this course will have understanding of general asset management which consists of tool control theories and FOD principles and prevention, as well as a deep understanding of the TCMAX asset management software, which is currently used by industry, government and the U.S. military.

### COURSE CONTENT INCLUDES:

- Definitions and General Principles of:
  - » FOD (foreign object damage/debris)
  - » FOP (foreign object prevention)
  - » FOE (foreign object elimination)
  - » FME (foreign material exclusion)
- Asset management theories and industry norms
  - » Five Levels of Tool Control
  - » FOD Prevention
- Operate asset management software (TCMAX)
  - » Create inventory database
  - » Monitor inventory levels
  - » Issuing and returning tools
  - » Establish calibration dates for precision tools
  - » Understanding reporting capabilities
