

INTELLIGENCE RUNS IN OUR FAMILY

OUR COMPLETE LINE OF *INTELLIGENT DIAGNOSTICS* TOOLS

Snap-on

Smarter. Faster. Fixed.

The industry's most intuitive diagnostic platforms, driven by the industry's most efficient and effective communications and experience-based software. All backed by the industry's most reliable customer support. That's what makes Snap-on® Intelligent Diagnostics tools such an intelligent choice.

Since day one, we've been committed to creating tools that enable technicians to work smarter. Whether you're a young tech looking for an entry-level scanner, a shop owner in need of a complete shop management tool or anyone in between, no one offers smarter solutions than Snap-on. As you'll see on the following pages, no one offers the range of choices we do, either.

Driven by Intelligent Diagnostics from Snap-on.®

ZEUS®

The intelligent choice for the shop owner, master technician or anyone else who wants the most troubleshooting and repair information possible without wading through unnecessary steps. The ultimate diagnostic tool – and the ultimate timesaver.

pg 4

TRITON-D8®

pg 6

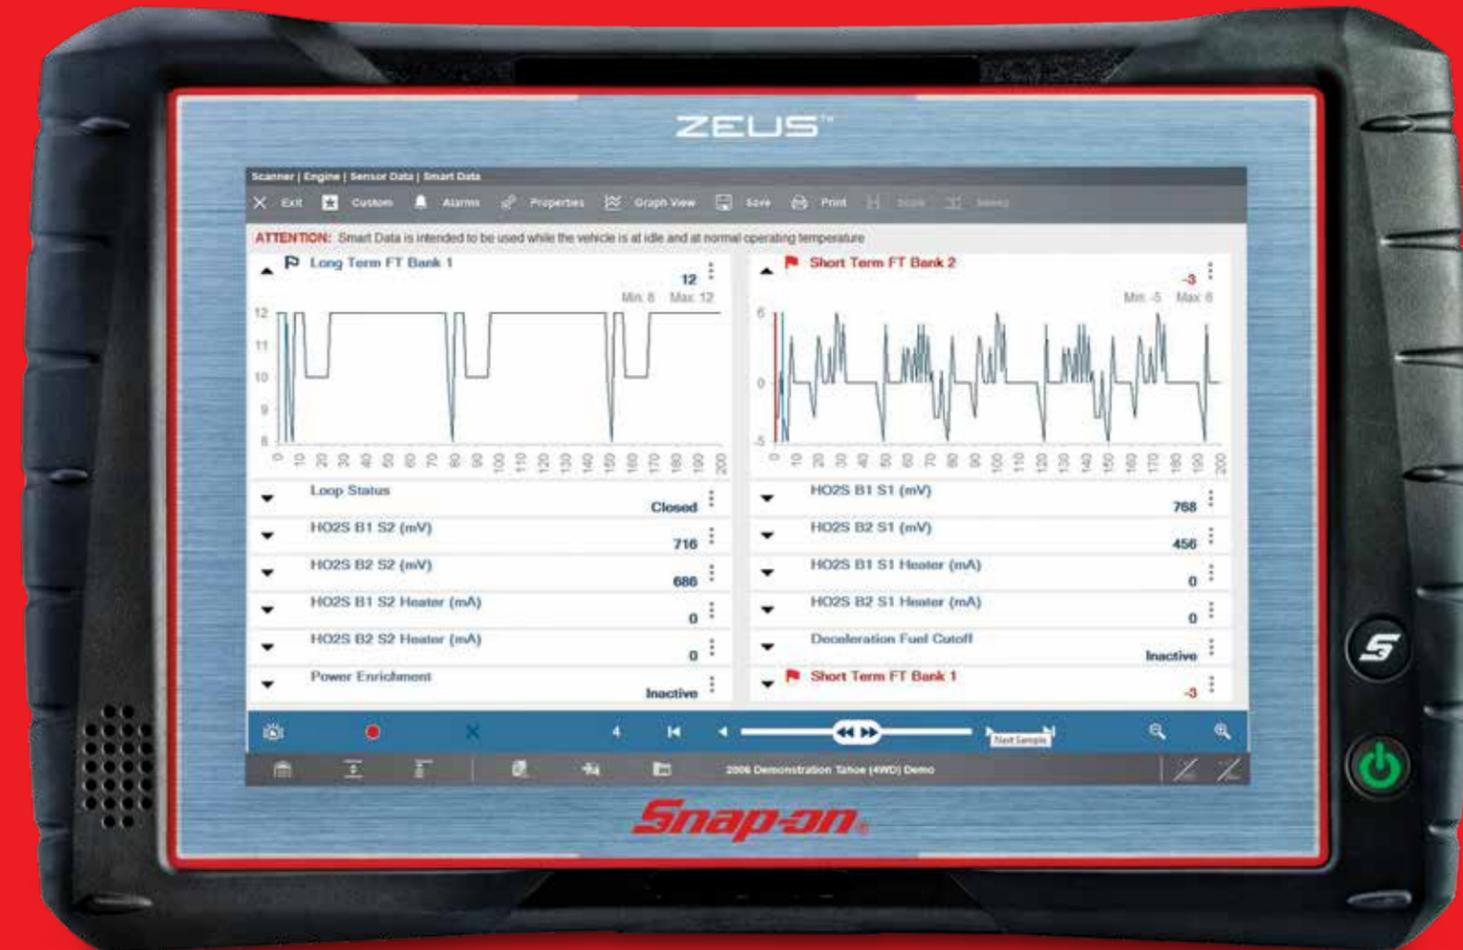

The intelligent choice for the shop owner or general technician who's looking to save time troubleshooting and wants the added convenience and advantages of a built-in scope.

APOLLO-D9™

The intelligent choice for the general repair technician who needs a tool that's ideal for getting through the everyday tasks and offers the advantages of filtered code and vehicle-specific data to help find the right fix fast.

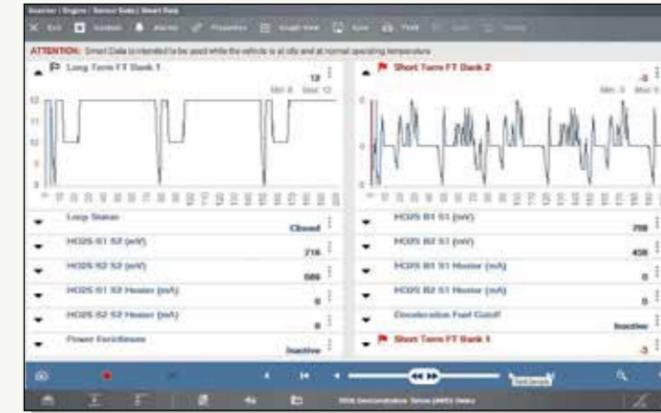

pg 8

Get the steps you need, while avoiding the ones you don't.

The first tool to feature Snap-on® Intelligent Diagnostics software, ZEUS provides all the functions and repair tips you need to diagnose, repair and manage any issue. But unlike any tool before, it practically anticipates your next move by guiding you through every step you need to find the solution, while avoiding the steps you don't. It displays only the information that's relevant to the specific vehicle and fault code. From Technical Service Bulletins and scanner Smart Data to SureTrack® real fixes, ZEUS is the most sophisticated, intuitive tool we've ever created. Accessing all the Intelligent Diagnostics functions requires an applicable software agreement, which more than pays for itself through its depth of information and time savings.

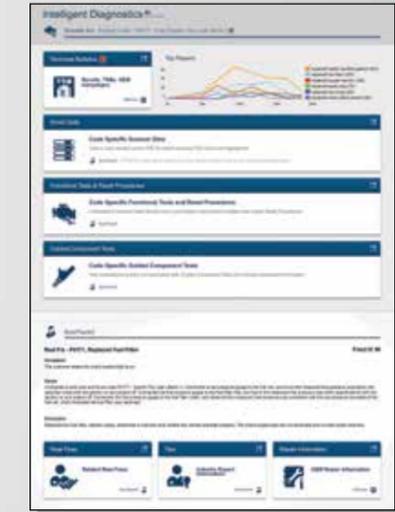

ZEUS®

View filtered PID lists and graphs specific to the vehicle and fault code. Flags highlight data that is out of expected range.

Access guided component and functional tests that provide you with clear step by step procedures.

Intelligent Diagnostics provides everything you need for that vehicle and that particular code on a single display.

Features

Display Tablet

- Thin and light tablet display, with a 10" 1280x800 high-resolution display for precise detail
- Capacitive touchscreen, sensitive to your every gesture for easy navigation
- Boots from cold in about a minute; powers up from Ready Mode in just 5 seconds
- Extended 5-hour battery life, with days of standby power in Ready Mode
- Built-in Wi-Fi® and Internet browser to access your choice of information resources wirelessly
- Bluetooth® to stay connected to the vehicle and the internet while moving freely around the service bay
- 64GB solid-state drive and a Quad-core Intel® Celeron® processor, and factory-installed Microsoft® antivirus and security essentials for secure operation

Built-in Software

- Integrated diagnostic suite for fast, easy navigation: scan tool, lab scope, Guided Component Tests, SureTrack expert information, TSBs, Oil specs & resets, data manager, optional ShopKey® Pro
- Comprehensive data manager that can store thousands of vehicle records, customer data, vehicle ID and diagnostic results
- Vehicle System Report shows all fault codes, readiness monitors in a customer-friendly format. Helps to sell services and communicate with customer
- Resets and relearn procedures to ensure that components register and are operating correctly
- Lightning-fast code scans, with a complete overview of the vehicle and its history for fast triage and workflow organization
- Pre- and post-scan capability for faster approvals, histories, repairs and payments

Scan Module

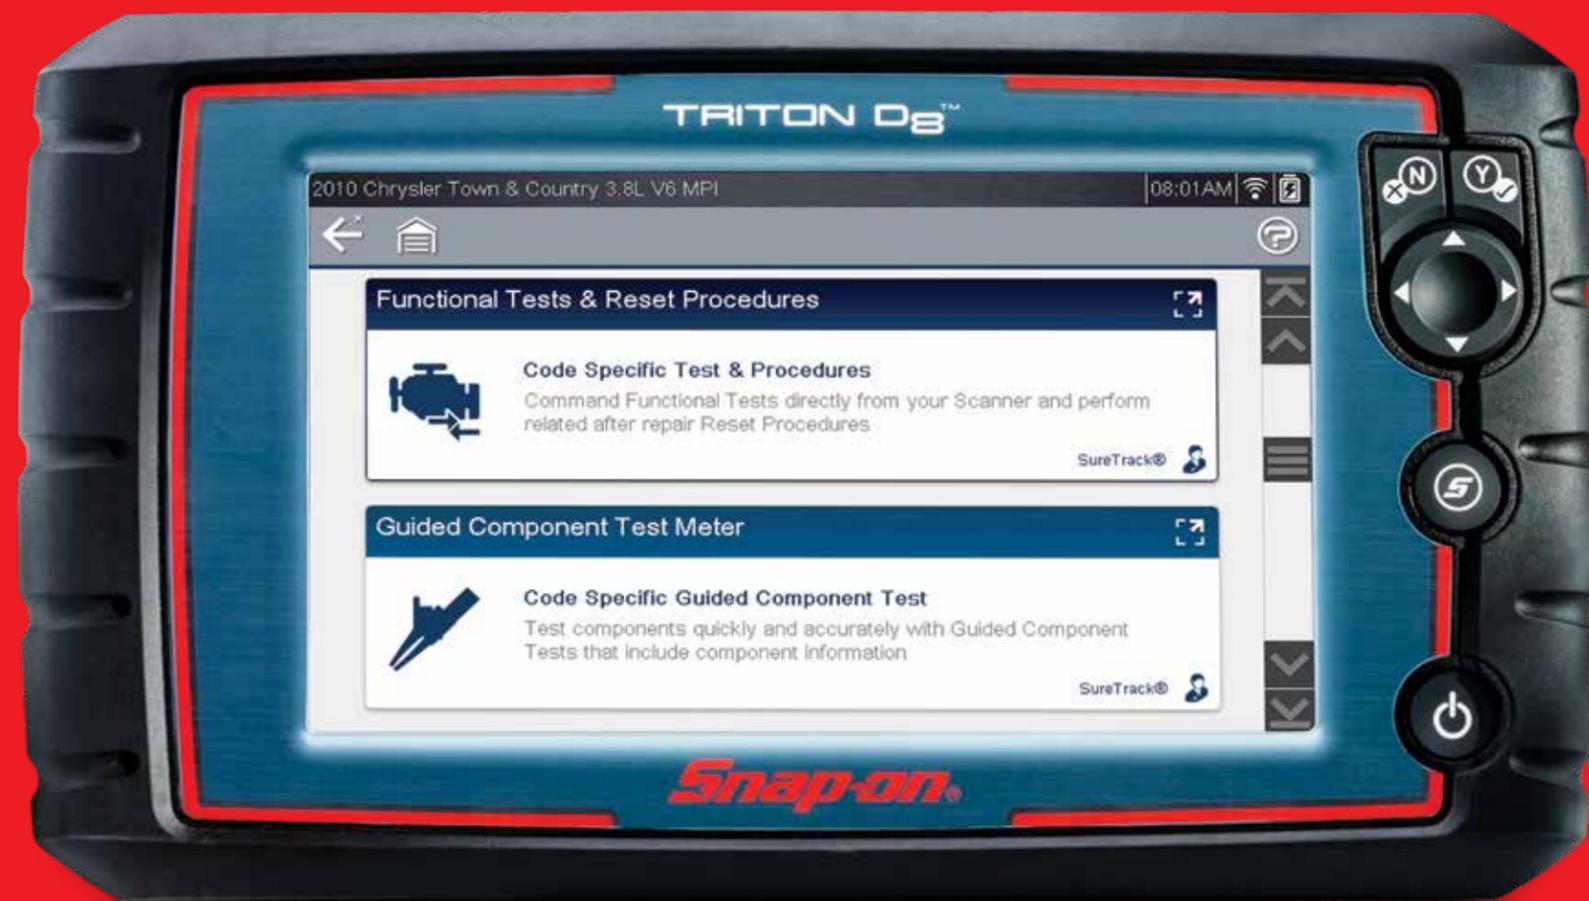

- Compact Scan Module is cordless, wireless, easy to carry in a pocket, and conveniently out of the way when connected
- One-Touch Full Vehicle Code Scan & Clear quickly checks and clears codes for all available modules on the vehicle
- OEM diagnostic functions, tests and coverage previously found only in expensive factory tools

Scope Module

- Modular, dockable lab/ignition scope/meter with 9 ft. USB cable for portability and reach
- Exclusive Fast-Track® Guided Component Tests show what to test, how to connect and what results to look for. Avoids unnecessary parts replacement

Intelligent Diagnostics Software

- Intuitive start screen featuring a comprehensive view of a logical diagnostic workflow
- Graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code
- Up-to-date, one-click access to relevant vehicle and code-specific OEM TSBs
- Functional tests and resets to quickly verify component operation, with easy-to-follow procedures to confirm and validate repairs
- "Smart Data," delivering relevant PIDS for the specific vehicle and code – and highlighting those out of expected range
- Firsthand insights from other technicians written specifically for Snap-on
- Ability to switch quickly between functions at any time – without having to go back to the start of the process

TRITON-D8®

Getting to the fix fast means getting to more jobs every day.

Whether you're looking for a tool for yourself or your shop, TRITON-D8 is the ticket. Featuring a built-in scope to help you quickly identify and verify faulty components, it provides all the time-saving features of Intelligent Diagnostics, plus productivity-boosting features like SureTrack® expert information and access to OEM TSBs and DTCs. All of which means it shouldn't take a genius to figure out how much positive impact it could have on your career — or your bottom line.

Features

Scope Module

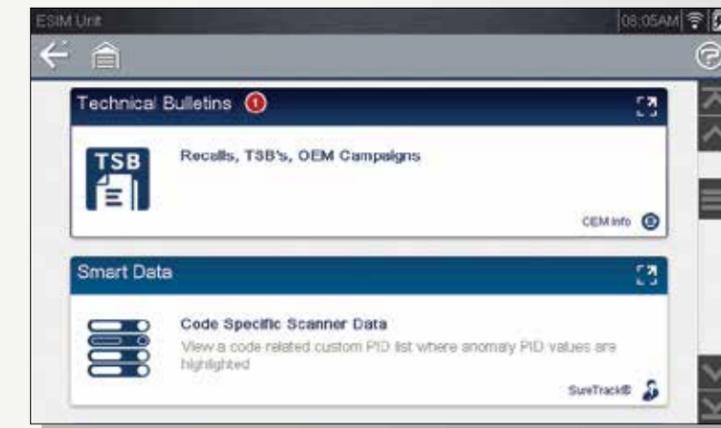

- Guided Component Test Meter pinpoints fault codes at a glance
- High-speed 2-channel lab scope displays live signals for two waveforms in real time
- Six megasamples/second captures high-speed details and faults other scopes miss

Fast, Productive and Simple to Learn

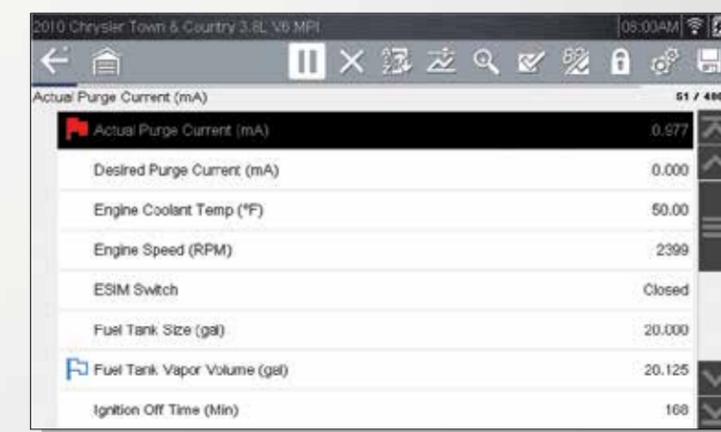

- Fast 5-second boot up and Instant Vehicle ID
- Resets and relearn procedures to ensure that components register and are operating correctly
- Lightning-fast code scans, with a complete overview of the vehicle and its history for fast triage and workflow organization
- Pre- and post-scan capability for faster approvals, histories, repairs and payments
- Verified repair tips and fixes via SureTrack, eliminating the need to consult other resources
- Links to the Snap-on® Cloud via altusdrive.com
- One-touch access to oil specs and service light reset functions
- Powerful Peak Detect function grabs glitches, dropouts and ignition spikes
- Scale range 0-100mV to 0-400V
- Sweep rate: 50 microseconds to 20 seconds (5 minutes in graphing meter mode)
- Automatic meter configuration matches the selected test — or customize settings manually
- Test coverage for sensors, solenoids, injectors, charging/starting systems, ignition, motors, pumps, ABS and many more

Intelligent Diagnostics Software

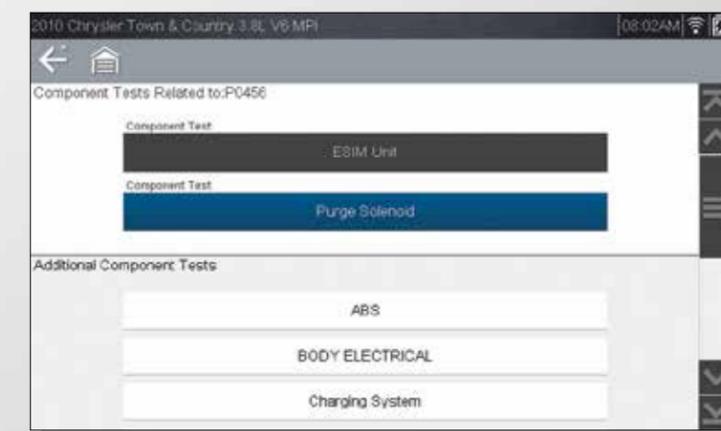

- Intuitive start screen featuring a comprehensive view of a logical diagnostic workflow
- Graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code
- Up-to-date, one-click access to relevant vehicle and code-specific OEM TSBs
- Functional tests and resets to quickly verify component operation, with easy-to-follow procedures to confirm and validate repairs
- "Smart Data," delivering relevant PIDs for the specific vehicle and code — and highlighting those out of expected range
- Firsthand insights from other technicians written specifically for Snap-on
- Ability to switch quickly between functions at any time — without having to go back to the start of the process

Relevant technical service bulletins. You'll save a huge chunk of time by accessing OEM TSBs for that code and that vehicle — all right on the tool and reachable within one simple click. Which makes it the ideal place to start your diagnosis.

The smart choice for smart data. With built-in "Smart Data", TRITON-D8 automatically configures the display to show vehicle parameters (PIDs) relevant to the fault code. It saves you even more time by filtering out non-related data parameters.

Built-in scope lets you verify component failure. Its Guided Component Test Meter pinpoints fault codes at a glance, helping you quickly identify the faulty component.

SOFTWARE + SUPPORT

How to make your diagnostic tool even smarter.

Software Subscription

Regularly scheduled software upgrades not only maximize your diagnostic tool investment, they guarantee it's always providing the same comprehensive performance as it did on Day One. Each upgrade provides updated coverage for new vehicles, expanded coverage for earlier models and thousands of new tips and tests. And by purchasing a software subscription you'll ensure that all your Intelligent Diagnostics features remain active. Just ask your Snap-on® Franchisee or other Sales Representative for more information.

Training Solutions®

Learn your way around your diagnostic tool and how to get the most functionality out of it with training videos, available online 24/7 at: diagnostics.snapon.com/trainingsolutions

The Snap-on Cloud

When using the most current software and connected to Wi-Fi, your ZEUS, TRITON-D8 and APOLLO-D9 can automatically upload vehicle system reports and screen captures to the new Snap-on Cloud, so you can access them from your phone or computer whenever you or your customer needs them. With the Snap-on Cloud, make your next diagnosis — and your next repair — quicker than ever before.

Go to altusdrive.com to get connected.

Accessories

We offer hundreds of smart ways to personalize, protect and expand your diagnostic investment. Just ask your Snap-on Franchisee or other Sales Representative for details. Or visit: diagnostics.snapon.com

Diagnostic Tools Quick Reference Guide
