Snap-on Introduces Pass Thru Pro II Flash Reprogramming Device

LINCOLNSHIRE, IL, July 15, 2009 – Snap-on’s new Pass Thru Pro II (EETA113B) brings OEM-level flash reprogramming to the independent repair shop. The certified SAE J2534 pass-through device connects to a PC or VERUS® diagnostic platform to update the software in vehicle electronic control units (ECUs) with software directly from the OEM, fixing software-controlled driveability and emission issues.

The EETA113B kit includes the Pass Thru Pro programming interface, software support CD, six-foot USB PC-interface cable, six-foot J1962 vehicle interface cable and instruction manual.

“With the new Pass Thru Pro II, Snap-on makes it easier than ever for professional service technicians to flash reprogram vehicles with the latest firmware and driver updates,” said Mark Schaefer, director of marketing, Snap-on Diagnostics. “Simply visit our Web site at www.passthru.pro.snapon.com to link to OEM Web sites for the required downloads.”

About Snap-on Diagnostics:

Snap-on Diagnostics is part of Snap-on Incorporated, leading global innovator, manufacturer and marketer of tool, diagnostic, equipment, software, and service solutions for professional tool users. Products are sold through its franchised dealer van, company-direct sales and distributor channels, as well as over the Internet. Founded in 1920, Snap-on is headquartered in Kenosha, Wisconsin.
