Snap-on Must Have Tool: Swivel Impact Sockets

KENOSHA, Wis. – May 27, 2010 – Getting the competitive edge is imperative if you want to perform more jobs quickly and efficiently during the course of a day. With Snap-on's Swivel Impact Sockets (307IPLMY and 207IPFM), you will be utilizing sockets that are manufactured to last longer and designed for easier use.

"We spent a lot of time listening to our customers to make sure we offer impact sockets that help make their jobs easier," said Scott Amundson, product manager for Snap-on. "Snap-on swivel impact sockets are really a 'must have' if you want to improve your efficiency and productivity."

The Snap-on Swivel Impact Sockets (307IPLMY and 207IPFM) features and benefits include:

- Broach depth - Advantage of Snap-on is depth of its swivel impact sockets will start to thread the nut onto the stud. Competitive sockets have a deeper hex that does not allow the nut to be started on the stud, so it has to be started by hand.
- Heat treat - Impact sockets are heat-treated to a lower hardness range as compared to chrome sockets.
- Pin collar is eliminated with new proprietary pin welding process
- Six percent reduction of outside diameter increases access for user
- Welded pivot pin reinforces socket wall and allows full 30 degree uninterrupted smooth action for efficient power transfer at any angle.

Customers can find out more about Snap-on's Swivel Impact Sockets (307IPLMY and 207IPFM) and other Snap-on tools by contacting their participating Snap-on franchisee, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
