Snap-on Tool of the Month: Heavy Duty Specialty Impact Swivel

KENOSHA, Wis. – February 22, 2011 – Certain jobs require special tools. Snap-on's 1/2-inch drive 12-point 5/8-inch low profile swivel impact socket (IPRD20) is a specialty tool that is perfect for use on starter bolts for most heavy duty engines.

"Snap-on's heavy duty low profile specialty impact swivel is great for the starter bolts on Cummins, Caterpillar and International engines," said Scott Amundson, product manager for Snap-on. "It is easy to use and provides great performance and power. It is also a time saver because you can use it with an impact gun."

The features and benefits of Snap-on's 1/2-inch Drive 12-point 5/8-inch low profile swivel impact socket (IPRD20) include:

- Flank Drive[®] wrenching system - socket delivers 15 to 20 percent more turning power, which requires less use and abuse of your power tool and sockets
- 30-degree uninterrupted swivel action means greater accessibility in tight quarters, which allows easier and faster removal of stubborn fasteners, thus saving time
- Heat treated to a lower hardness adds impact resistance and toughness, which allows a longer socket life
- Recommended for starter bolts on Cummins, Caterpillar and International engines and Detroit Deisel series 60 starter bolts – saves time as you can use an impact gun instead of having to use a wrench

Customers can find out more about Snap-on's 1/2-inch drive 12-point 5/8-inch low profile swivel impact socket (IPRD20) by contacting their Snap-on franchisee or representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
