## Save Time and Money with New “Must Have” Snap-on Injector Puller Kit for GM LB7 Duramax Engines

**KENOSHA, Wis. – July 25, 2013** – Easier and faster to use, the new Snap-on® Injector Puller Kit (IPK1170) for GM® LB7 Duramax® engines is a “must have” for removing the sleeve from the injector without causing damage. This time-saving kit will be an instant productivity enhancer for Snap-on customers working on *GM* light and medium trucks.

“Our new IPK1170 pulls the injector straight out of the full length of the nozzle tip without rocking which reduces the possibility of unwanted sleeve removal, saving service technicians a significant amount of time when performing this task,” said Scott Amundson, product manager for Snap-on. “If a sleeve does come out, the forked tool on the puller can be used to gently remove the sleeve from the injector without damage. Thus the sleeve can still be reused, saving both time and money.”

The *Snap-on* Injector Puller Kit (IPK1170) is designed to remove the diesel injectors from *GM* vehicles produced from 2001 to 2004 with an LB7 *Duramax* engine. These engines are found in light duty 2500/3500 and medium duty 4500/5500 *GM* trucks. Over time and miles, the injectors become heavily coated with carbon between the tip and sleeve causing them to stick together, making them difficult to remove.

Customers can learn more about the new *Snap-on* Injector Puller Kit (IPK1170) for *GM* LB7 *Duramax* engines by contacting their participating Snap-on franchisee or representative, visiting [www.snapon.com/handtools](http://www.snapon.com/handtools) or by calling toll free 877-SNAPON-4 (877-762-7664).

### About Snap-on Tools

Snap-on Tools is a subsidiary of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks.
