# Make Your Next “Road Trip” Easier With Snap-on Road Chests

*More Versatile and Portable Than Competitors*

**KENOSHA, Wis. – May 6, 2010** – It is never easy to repair a semi on the side of road. However, Snap-on’s portable heavy duty road chests (KRA6200, KRA6210) provide more versatility and efficiency, making service calls less time consuming and a lot more productive.

“We often hear from our heavy duty customers about the challenges they face when having to repair a truck that has broken down on the side of the road,” said Jay Serpe, product manager for Snap-on. “One of their biggest concerns is how to transport the necessary tools to do the job right. By incorporating their feedback into our design, Snap-on has developed road chests that are second-to- none when it comes to versatility and portability. These durable, high quality road chests are sure to make a difference when it comes to performing challenging road-side repairs.”

The features and benefits of the Snap-on KRA6200 road chest (with ISO-frame) and the KRA6210 road chest (with side handles) are numerous:

## **More Versatile**

- ISO-frame on KRA6200 can be removed and used with standard side handles for in-shop use on a roll cab.
- KRA6210 has two reinforced handles on either side for easier lifting and an additional transport point.
- Exterior lid lock has a t-handle to allow the lid to be locked or opened without key.
- Lid top compartment has internal drawer release for independent drawer operation, allowing the user access to drawers even if the lid cannot be opened.
- One four-inch drawer includes adjustable steel drawer divider set (KADDS2404) to organize tools and keep them in place.

## **More Portable**

- Both the ISO-frame handle system (KRA6200) and the side handle system (KRA6210) offer the ultimate in easy transport.
- Both handle systems can be combined in the same unit if needed.
- One-inch tubular frame (ISO-frame) with two-way forklift channels and top and bottom strap points allow the user to choose from a wide variety of transport options.

## **More Shock Resistant**

- Super strong bottom panel with two sets of support channels absorbs shock, sliding and lifting.
- Isolation Cage (ISO-frame) is supported by anti-vibration parts (KRA6200).
- Lock 'n Roll<sup>®</sup> on drawers helps keep drawers from jostling open.
- Dividers in bottom drawer provide organization and keep tools from sliding.

### **More Water Resistant**

- Exterior lid lock has water resistant flap for automotive-type durability.
- Independent drawer cover panel uses intuitive two-point latch system and operates separately from lid, preventing moisture and allowing drawer access when lid is closed.

Customers can find out more about the Snap-on's heavy duty road chests by contacting their participating Snap-on franchisee, visiting [www.snapon.com](http://www.snapon.com) or by calling toll free 877-SNAPON-2 (877-762-7662).
