## **Snap-on Electronic Torque Wrenches Feature World-Class Technology**

**KENOSHA, Wis. – May 25, 2010** – Knowing how much torque to use is essential when making repairs. It is equally important to use the proper torque tools. Snap-on's electronic torque wrenches are specially designed to help take the guess work out of how much torque to use and have the added benefit of improving productivity and efficiency.

"Snap-on's electronic torque wrenches are designed and manufactured using today's latest technology so you know how much torque you are applying," said Mark Knapp, product manager for Snap-on. "They are extremely accurate and will warn you if you are applying too much torque. Snap-on's electronic torque wrenches are state-of-the-art tools to make today's state-of-the-art repairs."

Snap-on's electronic torque wrenches feature:

- World-class torque application technology
- 100 percent solid state electronic design
- Fewer components which enhance reliability
- Limited moving parts reduces maintenance schedules
- Extremely accurate
- Ready-to-use out of the box with minimal set-up time
- Audible alarm alerts user to over-torque condition
- State-of-the-art gyro chip measures 360 degrees of angular rotation
- Enhanced strain gauge design accurately translates beam movement to torque value
- Certified to the most recent torque specifications
- Durable construction allows usage in harsh environments

Customers can find out more about Snap-on's electronic torque wrenches by contacting their participating Snap-on franchisee, visiting [www.snapon.com](http://www.snapon.com) or by calling toll free 877-SNAPON-2 (877-762-7662).
