Snap-on Classics: SOEXM707 Flank Drive[®] Plus Combination Wrenches

KENOSHA, Wis. – October 28, 2013 – When it comes to wrenches, professional technicians demand power, performance and durability. With Snap-on[®] Flank Drive[®] Plus Combination Wrenches (SOEXM707), service techs will find those necessities plus innovative features and top quality that they have come to expect from Snap-on.

“Snap-on Flank Drive Plus Combination Wrenches exceed the limits of any other open end design, featuring a patented series of flutes or notches that allow the open end to grip the fastener away from its corners much like Snap-on box end wrenches do,” said Mark Knapp, product manager for Snap-on. “These wrenches are tough and durable with nickel chrome plating that helps protect against corrosion and makes them easy to wipe clean, and like all Snap-on wrenches, they are sized for optimum comfort and balance in your hand.”

Snap-on Flank Drive Plus Combination Wrenches feature the *Flank Drive Plus* design that provides up to 62 percent more turning power than conventional wrenches. The force is directed away from the weaker corners of the nut and is directed to the stronger flats of the fastener. Additionally, the 15-degree wrench end offset orientation provides easy access to restricted areas. The box end is rotated 7.5 degrees away from the handle so the wrench can be flipped to get a new grip in tight situations.

Customers can find out more about the *Snap-on Flank Drive Plus Combination Wrenches* (SOEXM707) by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/handtools or by calling toll free 877-SNAPON-4 (877-762-7664).
