**FOR IMMEDIATE RELEASE**

**INCREASED MILEAGE: SNAP-ON ANNOUNCES TOOL UTILITY VEHICLES  
FOR MAXIMUM STORAGE AND ACCESS**

KENOSHA, Wis. (April 19, 2007) – Bigger is better, especially when it's on wheels. With the new Tool Utility Vehicles (TUVs) from Snap-on Tools Company, technicians can now experience unmatched mobility and storage space while on the job. Available in work center (KRLP1023) and top chest (KRLT1023) versions, these moveable storage units feature 20.5-inch wheels and boast over 3.5 tons of weight capacity, ensuring space for loads of tools.

Both models offer wider lockers than preceding models – 24 inches instead of 20 inches – and full depth risers, providing more space where it's needed most. And with polished aluminum rims, chrome lug nut covers and an upgraded patented braking system, moving – and stopping – has never been this easy or looked so good.

Built with Snap-on Masters' Series quality, the TUVs feature two extra-wide drawers, a high security tubular lock and Snap-on's patented Lock-n-Roll feature to prevent drawers from drifting open.

Constructed for maximum mileage and durability, both TUV models feature Snap-on's standing seam, which includes a top panel weld design that provides up to 10 times the strength of the competition's weld joint design. In addition, the spindles are cast from ultra high strength alloy and the pivot joints are oil-impregnated to ensure low maintenance.

Snap-on's new work center and top chest TUVs are packed with impressive features to provide lasting value and mobility. But going beyond the standard fare, each model can be customized and personalized with various options, accessories and drawer configurations. The TUVs are also available in 11 Snap-on colors and come with an industry-leading lifetime warranty.
