**SNAP-ON RATCHET WITH DUAL 80™ TECHNOLOGY EARNS SPOT ON
MOTOR MAGAZINE'S 2008 TOP 20 TOOLS LIST**

KENOSHA, Wis. (Sept. 19, 2008) – The tool that has everyone talking has also grabbed the attention of *MOTOR* magazine editors. The FLF80 Ratchet with Dual 80™ Technology from Snap-on Tools – the smoothest, strongest ratchet on the planet – has earned a spot on *MOTOR*'s 2008 Top 20 Tools list.

This marks the 17th year *MOTOR* has awarded the latest and greatest innovations from the world's automotive tool designers, manufacturers and suppliers, and 24 total products from Snap-on Incorporated to have been showcased.

"We are honored to once again be included on such a prestigious list," said Mike Gentile, president of hand tools for Snap-on Tools. "Our commitment to quality, innovation and productivity solutions has helped the Ratchet with Dual 80 technology become one of our most successful tools and we're proud to have it selected as one of *MOTOR*'s Top 20 Tools this year."

Created to offer the highest performance possible, the FLF80 was built based on feedback gathered from technicians on what would make the perfect ratchet. The Dual 80 technology provides an 80-tooth gear with dual pawls that supply up to 300 foot-pounds (3,600 inch-pounds) of ultimate torque.

The tool is designed to operate easily and precisely in tight spots. In addition to its impressive strength, the ratchet has 25 percent less ratcheting arc than its closest competitor, meaning the least amount of arc is required to engage the next gear tooth. The ratchet and socket together have the lowest height on the market, making it easy to use even in the tightest places.

And since dirt is always an issue whether in the shop or on the road, Snap-on's patented sealed mechanism keeps dirt out and lubrication in.

In addition to the Ratchet with Dual 80 Technology, the Prism Portable Imaging Aligner (EEWA557AL) from Snap-on Equipment was also named to *MOTOR*'s 2008 Top 20 Tools list.
