1/2-inch Drive 20EPL TORX Plus Internal Low-Profile Socket From Snap-on Tools

This new specialty socket from Snap-on was created exclusively for applications on QR25 Nissan motors with automatic transmissions, similar to the J45816 Nissan specialty tool.

The socket offers all the benefits of a Snap-on TORX® Plus and allows technicians to remove and install low profile drive plate and flywheels bolts.

Customers can find out more about the TORX Plus Internal Low-Profile Socket by contacting their local Snap-on representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
