Snap-on Must Have Tool: Ratcheting Combination Wrench Set

Features Patented Flank Drive® Plus

KENOSHA, Wis. – September 8, 2009 – Although every Snap-on tool is a “must-have,” over the years there are certain tools that every service technician needs to get through the day. One of those is the Snap-on 10-piece Flank Drive® Plus Ratcheting Combination Wrench Set (SOEXRM710).

“Our tools are indispensable in the workplace and our ratcheting combination wrench is no exception,” said Mark Knapp, product manager for Snap-on. “When we designed this wrench, we received input from service technicians who use these types of wrenches every day. We incorporated their ideas and suggestions into the development phase, and the result is a must-have set of ratcheting combination wrenches that every service tech should have in their toolbox.”

The Snap-on Ratcheting Combination Wrenches’ open end features the patented Flank Drive® Plus wrenching configuration that delivers up to 62 percent more power than conventional wrenches. The low profile, easy action reverse lever won’t get in your way. Plus, 88 percent more contact area on Snap-on’s patented dual pawl ratcheting box system translates to 40 percent more strength than competitive reversible wrenches.

Other additional features of the Snap-on 10-piece Flank Drive® Plus Ratcheting Combination Wrench Set include:

- Longer overall length for more leverage to let the wrench do the work.
- 12-point box end features Flank Drive® wrenching configuration, the proven design for turning fasteners.
- 15 degree offset for maximum knuckle clearance.
- Up to 80 gear teeth requires minimal movement in tight areas.

Customers can find out more about the Snap-on 10-piece Flank Drive® Plus Ratcheting Combination Wrench set (SOEXRM710) by contacting their participating Snap-on franchisee, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
