New Snap-on Brake and Fuel Line Wrench Set Provides More Grip, Less Slip

KENOSHA, Wis. – January 6, 2009 – Snap-on's new four-piece brake and fuel line wrench set (LW204) is designed to make even the most difficult jobs less time consuming, affording service technicians the opportunity to work more efficiently and work on more jobs during the course of the day.

"Once again, Snap-on has designed a set of tools that allow service technicians to save time on challenging jobs," said Scott Amundson, product manager for Snap-on. "The Snap-on LW204 four-piece brake and fuel line wrench set fits over 90 per cent of all domestic and import vehicles, making it the perfect tool for almost any vehicle that comes into a shop."

The four-piece, brake and fuel line wrench set includes: a 10mm (3/8") line wrench (LW10); an 11mm (7/16") line wrench (LW11); a 12/13mm (1/2") line wrench (LW1213); and a 14mm (9/16") line wrench (LW14). Each wrench in the set:

- Features spring-torque for a tighter grip on the fitting with increased force on the wrench - up to two times ANSI standards.
- Has compact fold-out chrome molybdenum wrench heads with black oxide finish.
- Removes even the most worn brake and fuel fittings.
- Works where other flare nut wrenches fail.
- Provides easy access to tight areas where fittings are found.
- Fits over 90 per cent of domestic and import vehicles.

Customers can find out more about the four-piece brake and fuel line wrench set (LW204) by contacting their local Snap-on franchisee, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
