Time is Money: Snap-on Inverted Torx® Socket with Countersink Improves Efficiency, Bottom Line

KENOSHA, Wis. – January 5, 2012 – Every Snap-on® tool is specially designed to make service technicians more productive, helping them to complete more jobs in the course of a day. The Snap-on E12 inverted Torx® socket with shallow countersink (FLCE120) is the perfect example of a time-saving tool that can improve efficiency and the bottom line.

“At Snap-on, our goal is to make each specialty tool we offer a real time saver for service technicians,” said Scott Amundson, product manager for Snap-on. “We work very closely with our customers to develop efficiency-enhancing tools like the FLCE120 that will make a positive difference in their work day. After all, in the vehicle repair business, time is money.”

Snap-on E12 Inverted Torx® Socket with Shallow Countersink (FLCE120)

- Job: Remove/install fastener that holds window regulators in place for BMW5 and 7 series
- Challenge: A standard E12 inverted Torx® socket will not engage the BMW window regulator Torx® fastener and could strip it.
- Solution: Use Snap-on’s E12 inverted Torx® socket with shallow countersink (FLCE120); it is specifically designed for use on BMW window regulator Torx® fasteners so you can engage the fastener and not worry about stripping it.

Customers can find out more about Snap-on’s time-saving tools by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com or by calling toll free 877-SNAPON-4 (877-762-7664).

About Snap-on Tools
