New Snap-on Semi-Deep Flip Sockets Made for Oil Changes on BMW Vehicles

Also Ideal for Removing, Installing Under Belly Pans on Variety of Makes

KENOSHA, Wis. – April 30, 2013 – Special jobs require exceptional tools. The new Snap-on® 1/4-inch Drive 8mm and 10mm Semi-Deep Flip Sockets (S6810) were created with service technicians and body shop techs in mind to help them save time when performing oil changes on BMW® vehicles.

“Our new semi-deep flip sockets are perfect for removing and installing BMW belly pans with 30 fasteners that are a combination of 8mm and 10mm. With the S6810, service technicians have the convenience of one tool to work on both sizes,” said Scott Amundson, product manager for Snap-on. “These sockets can also be used on other vehicles such as Lexus, Infiniti and Mercedes that utilize 8mm or 10mm fasteners to secure the belly pans.”

The new *Snap-on* 1/4-inch Drive 8mm and 10mm Semi-Deep Flip Sockets (S6810) are manufactured from special precision-forged, heat-treated alloy steel for optimum strength and durability. The double hex (12-point) allows the socket to engage a single hex fastener every 30 degrees rather than every 60 degrees, providing better access in restricted areas. These sockets are also a great choice for use on Chevrolet® Cruze® and Buick® Verano® splash shields that use 8mm fasteners.

Customers can learn more about the new *Snap-on* 1/4-inch Drive 8mm and 10mm Semi-Deep Flip Sockets (S6810) by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/handtools or by calling toll free 877-SNAPON-4 (877-762-7664).
