New Snap-on Handle Mount System Makes it Easier to Work with Electronics and Diagnostics

KENOSHA, Wis. – June 11, 2014 – Finding a spot on some storage units to place a computer or a diagnostic unit can be a challenge. With the new Snap-on® Handle Mount System (KAMH), users can place their monitor, keyboard, laptop or tablet exactly where they want it without interfering with the workspace.

“Our new KAMH handle mount system is the result of Snap-on working with its customers to give them exactly what they need to be more efficient and productive. These strong, durable extensions give added versatility to Snap-on tool storage units and make it more convenient to use diagnostic and computer equipment in the service bay,” said Jay Serpe, product manager for Snap-on.

The new *Snap-on* Handle Mount System (KAMH) includes a mounting plate and a vertical and horizontal swivel arm and features:

- Mounting plates angle to the entire 90 degree spectrum to create the ideal viewing angle and to avoid visual obstructions
- Swivel arm is included with handle mount kit; the arm rotates to a full 360 degrees and has two horizontal pivots to allow many access angles
- Components are made from aircraft-grade machined aluminum with anodized black coating for a very durable finish
- Optional plates (available separately) can be affixed to the arm to attach monitors, laptops, tablets (iPad) and keyboards

Customers can find out more about the new *Snap-on* Handle Mount System (KAMH) by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/toolstorage or by calling toll free 877-SNAPON-4 (877-762-7664).
