Time is Money: Servicing Ford 6.0L Power Stroke Diesel Engines

KENOSHA, Wis. – January 7, 2014 – Service technicians are challenged every day with jobs that require them to work in tight spaces. Snap-on offers durable, innovative tools that provide superior access to solve these daily challenges. One such tool is the new Snap-on® 3/8-inch Drive 3 1/8-inch T40 Bit Socket (S6340E), the ideal tool for servicing injectors on a Ford® 6.0 Liter Power Stroke Diesel Engine.

- **Job/Challenge:** Remove and install hold down fasteners on *Ford* 6.0L Power Stroke Diesel Engine. A regular length T40 bit socket is too short and a long T40 bit socket is too long when used with a ratchet or torque wrench and will not fit the application.
- **Solution:** The S6340E has a perfect length of 3 1/8-inches and is specially made for the removal and reassembly of *Ford* Power Stroke 6.0L diesel injectors.

“Our customers asked for a specialty tool to efficiently remove and install injector hold down fasteners on *Ford* diesel engines, and we have delivered with the S6340E. This T40 bit socket is designed with a precise fit and tight tolerance to prevent slippage and disengagement, so service technicians can save time and be more productive,” said Scott Amundson, product manager for Snap-on.

Customers can learn more about the new *Snap-on* 3/8-inch Drive 3 1/8-inch T40 Bit Socket (S6340E) by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/handtools or by calling toll free 877-SNAPON-4 (877-762-7664).

About Snap-on Tools
