Snap-on Offers 10 Percent Off on Diagnostic Software Bundle 13.2 and Optional European Coverage

Limited-Time Offer Ends May 31

LINCOLNSHIRE, IL, April 29, 2013 – Now through May 31, 2013, Snap-on is offering technicians 10 percent off list price when they upgrade to the new Software Bundle 13.2 or purchase the optional European coverage. This limited-time offer from participating Snap-on representatives for customers in the U.S., Canada and Puerto Rico makes the most current diagnostic coverage more affordable than ever.

“This introductory offer for new Software Bundle 13.2 gives every shop or technician the change to get the most up-to-date diagnostic information at the very best value now,” said Leian Wunderlich, marketing manager, Snap-on Diagnostics. “The software’s new and enhanced features and coverage, plus all of the coverage from previous software releases, help technicians improve repair accuracy so they can fix more cars faster, which means higher profit.”

The new coverage in Snap-on Software Bundle 13.2 includes additional diagnostic capabilities for more than 63 million vehicles on the road today, expanding repair shops’ service reach, while fueling efficiency and productivity in the bay. Technicians can service more cars than ever before because the newest Snap-on diagnostic software upgrade offers 54,000 new codes, tests, tips and data going back to 1998 for all major makes, plus new 2012 domestic and Asian model year coverage for Acura, Chrysler, Ford, Honda, Hyundai, Kia and Mitsubishi.

The newly enhanced Snap-on optional European coverage is also available for nine European makes – Audi, BMW, Jaguar, Land Rover, Mercedes-Benz, MINI, Smart Car, Volkswagen and Volvo. This newest release includes the largest addition of BMW enhancements to date, including codes, data and tests for the parking brake, without this function the brake pads can’t be replaced; body controls modules and HVAC, allowing techs to drastically reduce diagnostic time by bi-directionally activating body and HVAC components.

Software Bundle 13.2 and the optional European software is available for VERUS[®], VERDICT[®] and SOLUS[™] Family platforms, as well as MODIS[™] and ETHOS[®] diagnostic tools.

For information about this limited-time software offer, contact your Snap-on representative.
