

TOOLS AT HEIGHT

HELPING YOU WORK SAFELY

The tethered tools system from Snap-on increases job site safety and efficiency by preventing dropped hand tools from causing injury and causing damage. The system provides storage of tools when not in use, as well as their secure transportation to the workplace, and retention devices that prevent tools from being dropped.

MANY INDUSTRIAL USES

Tethered tools benefit industries where a dropped tool could injure personnel, damage machinery or cost production time. Current customers encompass the oil and gas, energy, aerospace, rail, automotive, marine, and military industries.

- High-level applications include wind turbines, cranes, buildings, bridges, telecommunication masts, power lines, railway gantries, aircraft hangars, etc.
- Low level applications stop tools from falling into engines and gearboxes, food and pharmaceutical production lines, underground shafts, overboard onto divers...

SNAP-COIL LANYARD ATTACHMENT LINKS

(patent pending)

No weld has ever failed in our original welded links, yet we decided to eliminate welds by inventing Snap-Coil. Now no welds to check or fail.

High Performance – Made from stainless steel and chrome plated, Snap-Coils have superior flexibility and shock-absorbing qualities over welded links.

In-house Fitting – Instead of sending tools to an outside shop, Snap-Coils are fitted inhouse. Cost is now lower and finish is higher (no weld marks).

Snap-on
LEVEL 5
Tool Control System™

SAFETY IN DESIGN

Tethered Tools can be applied to a wide range of hand tools and cordless power tools to which lanyards can be fitted. Lanyards are designed to be attached to the operator's wrist, belt, harness or suitable site tether locations.

- Tool's original functionality and quality are maintained.
- Enables unrestricted tool use without impeding operator's mobility or compromising his personal safety equipment.
- All components are inspected, tested and certified before delivery to ensure safe operation.
- Maintenance and operational guidelines help users achieve maximum system efficiency and provide proper training of operators.

SAFETY FIRST.

Regardless of your at-height applications, Snap-on has your tool safety covered – providing a complete selection of retention devices that prevent tools from being dropped.

With a wide selection of bags, tool holsters, Snap-Coil links, lanyards, and tethers, the Snap-on tethered tools system provides storage of tools when not in use, secure transportation to the workplace, and, of course, safe use of tools at the jobsite.

Call your Snap-on Industrial sales representative. See inside back cover for additional contact information.

Tools At Height

3/8" Drive Shallow Sockets, 6-Point, Metric

THFSM81	8mm socket
