LEVEL 5 TOTAL ASSET MANAGEMENT

WE'RE MORE THAN A TOOL COMPANY

- We manufacture over 15,000 standard tools.
- Ready with specialized and modified tools to meet your unique and often demanding needs of your business.
- Constantly searching for new and innovative ways to do the job.
- The broadest range of tools anywhere on the planet.
- We solve problems – with maximum results.
- We put an extra margin of safety into every tool we make.
- Total commitment to ergonomics for maximum user control and comfort.
- Doing more to organize, secure and control your tools.
- Putting it all together with the most experienced, dedicated and creative team of problem solvers in the business – the Snap-on sales force "Solutioneers."

CUSTOMER SERVICE

- We have always been "Solutioneers" because we and our partners are a "Problem Solving Team".
- The finest quality tools and equipment, backed up with warranties, training and day-to-day follow-up.
- Value-added customer service actually reduces the original cost of tools and equipment.
- Warranty, replacement and continuing service back up our tools with whatever it takes to keep your business profitable.
- Committed to industry through memberships, associations and technological advancements.

To order, call the Snap-on Customer Service Center at 1-877-740-1900 or contact your account manager.

E-MAINTENANCE

YOU'RE DEVELOPING ADVANCED PREDICTIVE MAINTENANCE PROGRAMS FOR YOUR AIRCRAFT – USING MORE AND BETTER INFORMATION. YOU HAVE THE DATA. WE HAVE THE MEANS TO CONTROL AND APPLY IT.

Exciting new e-maintenance initiatives are being developed in the aviation industry, holding great promise for the future of predictive maintenance — the gathering and integration of data, cost control and, most importantly, aircraft performance and safety.

Level 5 Tool Control Systems can play an important role. In fact, a central role. Level 5 can be your e-maintenance hub. Where information, tools and staff come together at a simple but powerful touch-screen module. Your staff has instant access to critical flight data, fully coordinated with ground computers. They locate the required tools and instruments, initiate the maintenance, even access appropriate manuals. All from a single touch-screen.

Total integration of data, tools and talent. The bottom line? Higher-quality work, when and where you need it.

That's total peace of mind. That's Level 5 from Snap-on.

- **Integrate into your Asset Optimatization Centers (AOC) for seamless coordination of predictive/pro-active maintenance needs with the appropriate tools and staff.**
- **Simple, intuitive touch screen – easy to learn and operate.**
- **Includes TC Max technology – with unique "talking" issue and turn-in prompts for fast, accurate operation.**
- **Keyless entry – with an employee badge reader. No keys, no worries about missing/stolen tools.**
- **Cost-effecitve solution – no server, no server to upgrade, no custom software.**

Snap-on LEVEL 5 Tool Control System™

LEVEL 5 TOOL CONTROL

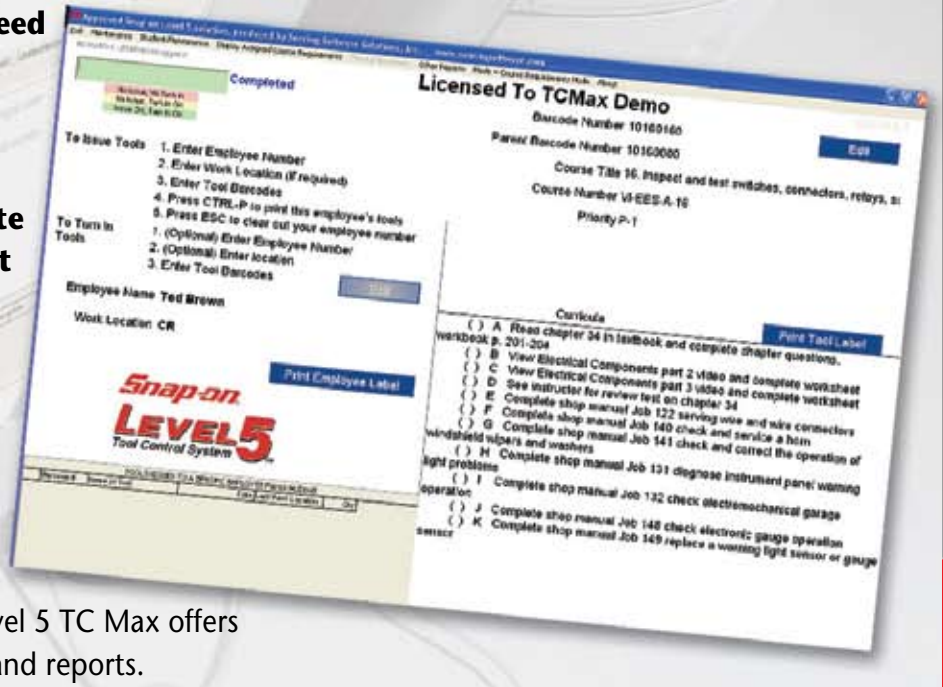
TOOL CONTROL SOFTWARE

FOR EDUCATION

SOFTWARE THAT TALKS!™

Level 5 is Tool Control Software that talks, eliminating the need to repeatedly look at the computer screen between barcode scans.

It is the fastest, most accurate way to check tools in and out and track NATEF task accomplishments.



VOICE PROMPTS

For educational applications, Level 5 TC Max offers instructors NATEF task tracking and reports. Additional voice prompts include: "Student", "Enter Grade", and "Completed". These features virtually guarantee 100% accurate task tracking and tremendously speed up accurate task and student achievement reports.
For asset and tool management, Level 5 warns users with an audio prompt – "Overdue Calibration", "Inspection Over Due" or "Caution: Tool Removed" – when necessary. Plus, it says "Issue", "Turn In", and "Enter Quantity" as appropriate to prompt the user.

LABEL MAKER

Custom label making software is included with Level 5 that easily (really!) allows you to print your own barcode labels.

LEVEL 5™

TOOL CONTROL

Level 5 Tool Control is the most comprehensive program of its kind in the industry. Every tool that goes out the door has a system for control designed right in, right from the start, ready to be applied. And best of all, it's a system that can be set up according to your specific needs. It's even scalable to continue to fit your needs now and into the future. The idea is to keep you working – safer, more efficiently, more productively, with fewer losses of time, talent and equipment. All in accordance with aviation specification requirements and FOD.

WE'RE MORE THAN A TOOL COMPANY

The TC Max Mobile Pocket PC

Handle physical inventories quickly and simply. From anywhere in the plant or facility.

L5CMC70 with a built-in imager for both 1-D and 2-D barcodes. It talks to you just like TC Max on a PC. It's perfect for performing physical inventories of assets or for issuing and turning in items at a remote location. Supplied with a Symbol Gold service agreement that covers accidental damage.

L5CMC70

TC Max® Asset Management

L5CLS2208

L5CP370USB

Barcode Scanners

L5CP370USB is a wireless barcode scanner, with a keypad on the top and is our most popular scanner. It does NOT do 2-D PDF417 or DataMatrix barcodes, but it is great for all 1-D applications. The P370 is perfect for most applications. Keypad on the top allows you to easily enter quantities of items without having to return to the computer keyboard.

L5CLS2208 has a six foot USB cable that plugs into the PC or laptop. Works best when all items to be scanned are within 5 feet of the PC.

L5CHHP4620 is a 2-D scanner that can read all linear barcodes plus 2-D barcodes like PDF417 and DataMatrix, but NOT on chrome plated tools. Great for 2-D labels and is wireless but does not have a keypad. Also available is the **L5C4600SF** which has a 6 foot USB cable (not wireless).

L5CHHP46LEN can read a DataMatrix barcode on a chrome plated tool! This special modification is available on this scanner with a 6 foot USB cord and on the Pocket PC. Requires that tools be laser engraved with a DataMatrix barcode, with our specifications.

Label & Receipt Printers

L5CPT9500R3 Easy to install and set up. Label cost is about 25 cents per label to the end user. It makes a plastic label that sticks well and is easy to read. Switching label material size is easy. We include 5 rolls of industrial grade white 3/8" tape; will give the user about 500 labels. Use this printer to print individual replacement labels or labels in small quantities.

To print 1/2" wide labels, order **L5CPT9500R5** printer. Includes 5 rolls of 1/2" industrial grade label tape.

L5CTZS221 3/8" Label Tape Roll
L5CTZS231 1/2" Label Tape Roll

L5CTLP3844 Prints on indestructible label material that is very difficult to pick off anything. With other labels, once the label starts to peel off, the rest of the label soon follows. This label will only chip and will not peel off. Label costs are rather low, 4 cents per label, and the 3/8" x 11/2" label is utilized by pocket badges.

L5CZDLAB 6,000 Z-Destruct label with one ribbon.

L5CWP0517 Polyester label material for your laser printer, 1/2" x 13/4", 80 labels per sheet, 50 sheets.

L5CWP3R8 Polyester label material for a laser printer. 3/8" x 11/2", 10 sheets, 125 labels per sheet.

L5CPT9500R3

L5CTSP743U Thermal receipt printer with USB interface, 208 dpi. Barcodes on the receipts expedite the turn-in process at a busy tool crib and can be used on the job to show what tools you should have at this time.

L5CTSP743U

Signature Pad

L5CSIGPAD Required to support electronic capture of signature, provide proof of delivery and return by a specified individual.

L5CSIGPAD

Level 5 Tool Box Adapter

L5CADA RS232 adapter box, cable, and USB to RS232 adapter to connect Level 5 Tool Box to a PC and TC Max.

TC MAX®

Asset Management Software. SO SMART, IT EVEN TALKS.

- No guessing. Unique audio response confirms issue and turn-in.Even keeps track of calibration schedules.
- No lines at the tool crib. Employee, tool and location entries are fast and accurate.
- Single screen for over 90% of the functions.
- No paper records. The total digital solution.
- No tools unaccounted for.
- No labeling headaches with simple, TC Max custom label maker.
- No learning curve. It's simple and intuitive.

THE BIGGEST COST? PUTTING IT OFF.

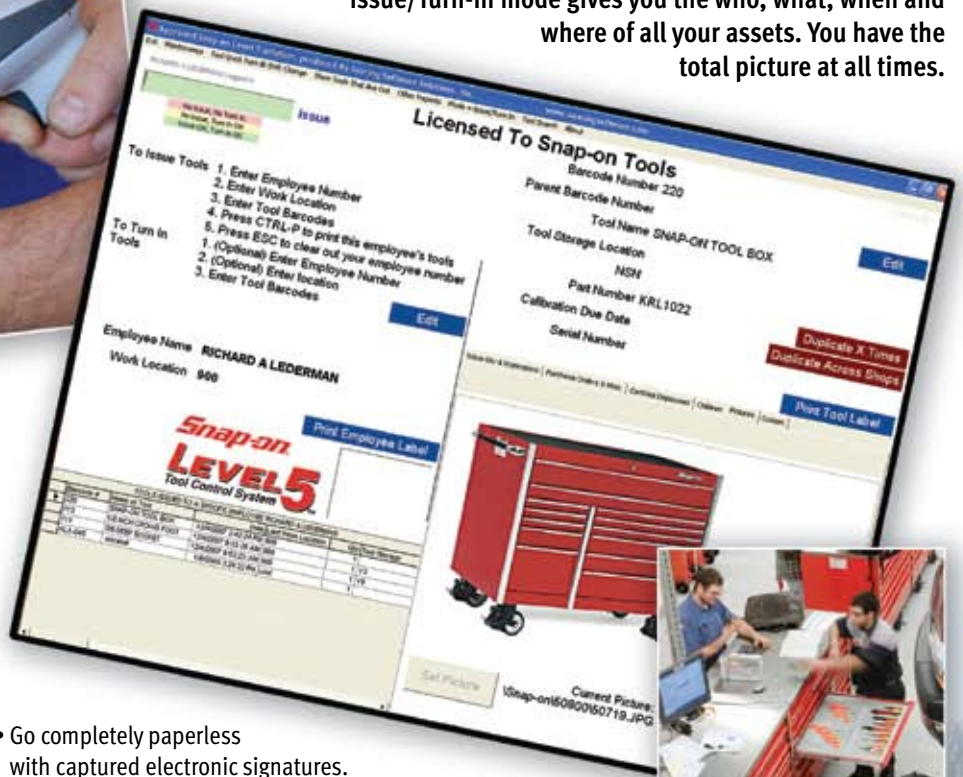
Lost equipment, the time tracking things down, the paperwork, the lines, the processes, the time spent slogging through complicated inventory procedures. The costs can be huge.

With TC Max, the savings start immediately, and keep adding up. It's all about lean processes today, and TC Max speaks the language.

EASY TO LEARN. EASY TO MANAGE.

The world's most advanced asset management system also happens to be the most simple. Easy to learn – easier to operate. It adds up to more accuracy and higher productivity. TC Max puts who, what, when, and where, right at your fingertips.

Issue/Turn-in mode gives you the who, what, when and where of all your assets. You have the total picture at all times.



GROWS WITH YOUR BUSINESS. A SYSTEM FOR TODAY. AND TOMORROW.

More than a system for inventory. A system for change. And that means cost-savings today, tomorrow and into the future. TC Max can be customized to fit your changing needs.

- Operates on Microsoft Access® database, but SQL Server is also supported.
- Share the database on a network with computers using SQL Server.
- No custom software. Standard packages save you time and money.
- No special software modules. Everything is included.

- Go completely paperless with captured electronic signatures.
- Increase security by identifying employees via company ID, driver's license, barcode, or even fingerprints!

A DIFFERENCE YOU CAN SEE AND HEAR.

Our sign out system is as simple and intuitive as it gets. One screen covers both issue and turn-in. And with our unique audio prompt/command system, we even tell you what's going on.

LEVEL 5 TOOL CONTROL

TOOL CONTROL SOFTWARE

TC Max®

Asset Management Software

We Speak the Language!

Snap-on®

TCMax®

Asset Management Software.

IT DOESN'T COST YOU MONEY, IT MAKES YOU MONEY.

THE BIGGEST COST? PUTTING IT OFF.

Add up the costs. The daily drip, drip, drip of lost equipment, the time tracking things down, the paperwork, the lines, the processes, the time spent slogging through complicated inventory procedures. The costs can be huge.

With TCMax, the savings start immediately, and keep adding up. It's all about lean processes today, and TCMax definitely speaks that language.

SO SMART, IT EVEN TALKS.

It's the software system that's taking asset management to a whole new level of speed, control, accuracy and cost-effectiveness. The first system that talks. More importantly, the first one that really delivers.

- **No guessing. Unique audio response confirms issue and turn-in. Even keeps track of calibration schedules.**
- **No lines at the tool crib. Employee, tool and location entries are fast and accurate.**
- **Single screen for over 90% of the functions.**
- **No paper records. The total digital solution.**
- **No tools unaccounted for.**
- **No labeling headaches with simple, TCMax custom label maker.**
- **No learning curve. It's simple and intuitive.**

Streamline your parts department or tool crib with TCMax asset management software. You'll know at a glance "who, what ,where and when". For training situations, TCMax can also be used for task tracking to provide students with data on their efficiency.

TCMAX GROWS WITH YOUR BUSINESS. A SYSTEM FOR TODAY. AND TOMORROW.

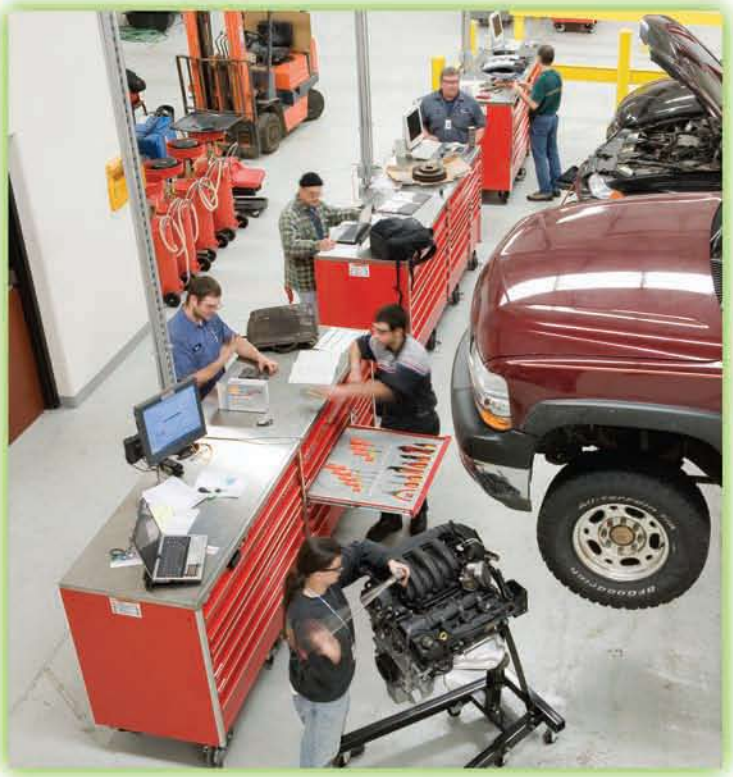
More than a system for inventory. A system for change. And that means cost-savings today, tomorrow and into the future. TCMax can be customized to fit your changing needs.

- **Operates on Microsoft Access® database, but SQL Server is also supported.**
- **Easily share the database on a network with thousands of computers using SQL Server.**
- **No custom software. Standard packages save you time and money.**
- **No special software modules. Everything is included.**
- **Go completely paperless with captured electronic signatures.**
- **Increase security by identifying employees via company ID, driver's license, barcode, or even fingerprints!**

THE MANAGEMENT TOOL ANYONE CAN MANAGE.

The world's most advanced asset management system also happens to be the most simple. Easy to learn – easier to operate. It adds up to more accuracy and higher productivity. TCMax® puts who, what, when, and where, right at your fingertips.

- **Simple and intuitive, easy to operate.**
- **Audio "issue" and "turn in" lets personnel scan barcodes faster, without looking at screen.**
- **Audio alarms for calibration and inspection history and uncertified personnel.**
- **No constant switching of screens. TCMax is fast, and that increases productivity.**
- **Full reports on tools and assets, location, employee, restocking/ ordering and more – the total "digital" information trail.**
- **Single barcode for multiple identical tools and equipment.**
- **Tools and equipment can be marked for single use or in quantity.**
- **Assign attachments to an asset, such as an instruction book for a tool or an MSDS for a chemical, then access the attachment with a single keystroke**



Who has it? What did they do with it? When did they take it? What job do we invoice for it? TC Max has all the answers – and now, so do you. TC Max asset management software gives you the total picture at all times, whether your operation is large or small.

ISSUE/TURN-IN MODE.

A DIFFERENCE YOU CAN SEE AND HEAR.

A well-organized sign-out system. We think it starts with a well-organized page. And ours is as simple and intuitive as it gets. One screen covers both issue and turn-in. And with our unique audio prompt/command system, we even tell you what's going on.

Visual
TC Max displays a visual reference of the barcoded item. In this case the barcode is for a parent tool box which contains several "child" barcodes.

Barcode
The barcode is entered for the specific asset and all applicable information is displayed such as facility location, maintenance schedule information, etc.

Employee
Each employee authorization can be limited to specific assets as needed.

Issued Tools
TCMax displays the total number of assets issued to the specific employee

"Incorporating the TCMax tool control system has saved the Automotive Technology program thousands of dollars in tool replacement expenses. Additionally, it saves time by easing the management of tool issue, calibration and utilization tracking. The system is tailored to promote accountability by the technicians as well as instilling a sense of pride."

Wes Wojciechowski – Gateway Technical College

Snap-on®

PHYSICAL INVENTORY MODE.

CUT COSTS AND ADD EFFICIENCY.

Simple, fast and accurate. Just enter the information – employee and location number and the number of the trailer/truck/building being inventoried. Then quickly start scanning barcodes. Keep going as long as you keep hearing "turn in." You'll hear "enter quantity" for multiples and "issue" when something is out of place. We've had customers tell us this feature cuts inventory time from a week to less than a day!

When seconds count, it's critical to know your inventory is intact. The TC Max system makes sure nothing is overlooked and nothing is taken for granted. TCMax can also eliminate surprises by alerting you that disposables need to be re-ordered.

TCMax® can cut your inventory time by as much as 90%. The convenient remote PC unit lets you take inventory as fast as you can scan the items. You can also rely on TCMax to alert you to minimum quantities and items that have calibration or inspection schedules.

Expendables
In this example "show expendables only" has been selected for instant status on all disposable inventory items.

Barcodes
Each inventory item has been assigned a barcode for instant status reports.

Visual
TCMax can display a visual image of the inventory item.

Dollar Amount
Automatic display of current inventory value.

Re-ordering
Items marked with red have dropped below their pre-determined minimum on-hand quantity. TC Max lets you instantly re-order through the TCMax Purchase Order screen.

"Having a complete (and tested) inventory on a fire truck or ambulance is critical. With the TCMax software, we accomplish in hours what used to take days. One of the big pluses for us is the accuracy of the system. It discourages staff from taking shortcuts and doing a "speed inventory".

Chief Tom Keimer – Margaretta Township

CONSUMABLES.

A SYSTEM FOR CONSUMABLES THAT YOU CAN COUNT ON.

All the information you need on consumables is right there in front of you – on the same screen you use for issue/turn-in. It's simple, easy and efficient. And, again, it even talks to you.

- **Check the "No Turn In" box for consumables. When issued, the quantity in stock is reduced by one.**
- **If the "Issue Multiple Tool" box is checked, TCMax® speaks up. It asks how many by saying "enter quantity" – then removes that quantity from your inventory.**

CHANGING SHIFTS? MAKE CHANGES IN SECONDS.

Incredibly simple. Just click the "shift change" menu option from the main screen and make a couple of quick entries. Save time and money by instantly transferring assets to the next-shift employee. Easily customize the system to exclude certain assets from the shift transfer or to limit the issue of certain assets to specific employees, such as those not certified to use a certain tool.

- **Plug in the employee number or ID of the person who currently has custody of the tool or equipment.**
- **Then hit the "transfer" button.**
- **The assets are automatically transferred to the next-shift employee. You can exclude items from the transfer if you choose to do so.**

CHECK UP ON THE CHILDREN. AUTOMATICALLY.

The advanced parent/child feature gives you total knowledge and total control over your assets and equipment. That's total peace of mind.

- **Assign the parent barcode number to the tool set which contains torque wrenches and other inspection and calibration equipment.**
- **When the tool box is issued, TCMax automatically checks all calibration and inspection dates for components within the set, and warns you if any are overdue.**
- **If the tool/equipment has previously been issued, the software warns you of its removal.**
- **Click one button, and see which tools and equipment have been removed.**

Asset control isn't just about saving time and saving money. Eliminating FOD (foreign object damage) can literally save lives. TCMax can also coordinate with your invoice process by tracking parts and supplies that are to be billed to a certain project.

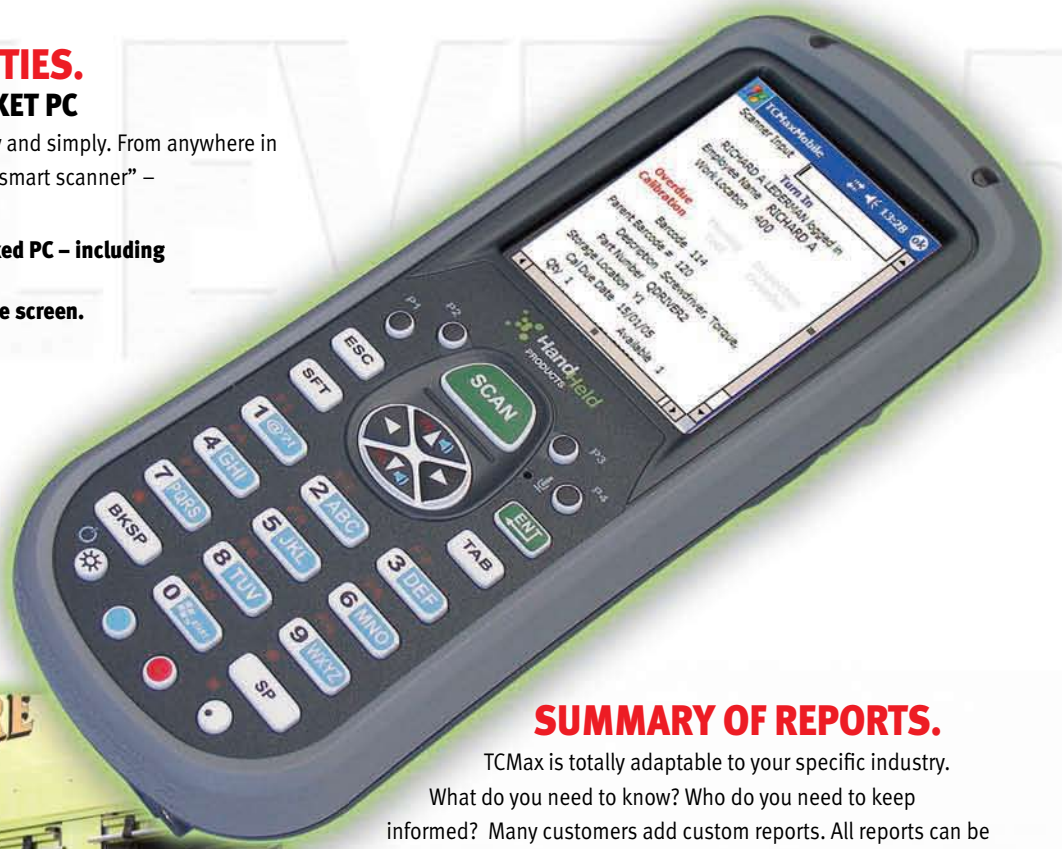
TCMax works in all sorts of applications, across all sorts of industries. The software can also be adapted to your specific needs. TCMax is also built to grow with your growing business. One client, an electrical contractor, had this to say about TCMax, "TCMax is an important asset for keeping track of our tool inventory. With 85 electricians taking tools to job sites every day, it would be impossible to maintain any type of control without it."

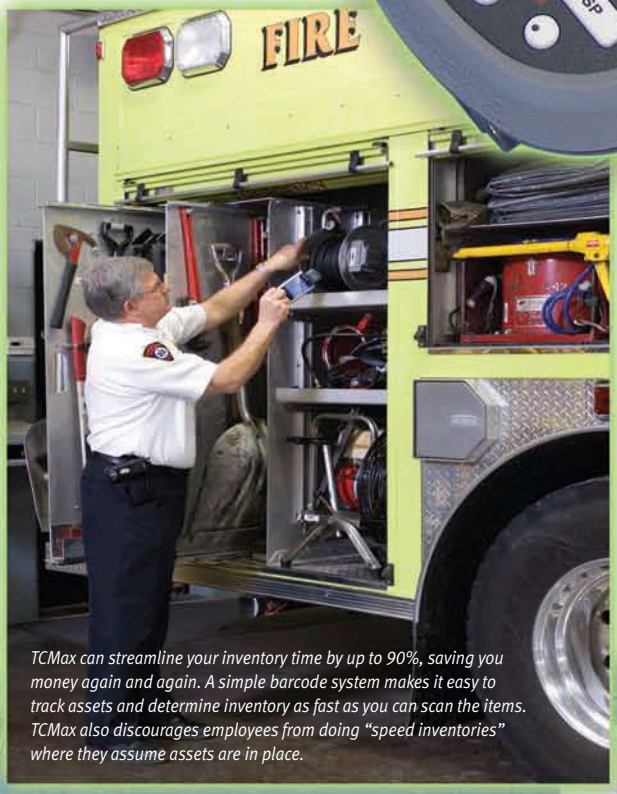
REMOTE POSSIBILITIES.

THE TC MAX MOBILE POCKET PC

Handle physical inventories quickly and simply. From anywhere in the plant or facility. Thanks to our "smart scanner" – TCMax® Mobile Pocket PC.

- **Many of the same functions as fixed PC – including audio prompts and commands.**
- **Add employees or tools – from one screen.**
- **Issue and turn in tools from a remote location.**
- **Works with a broad range of pocket devices.**

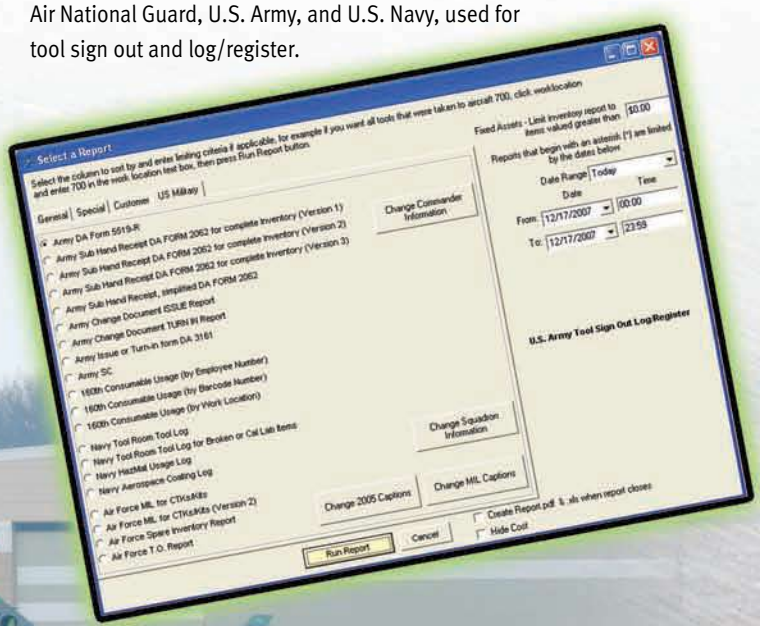




TCMax can streamline your inventory time by up to 90%, saving you money again and again. A simple barcode system makes it easy to track assets and determine inventory as fast as you can scan the items. TCMax also discourages employees from doing "speed inventories" where they assume assets are in place.

SUMMARY OF REPORTS.

TCMax is totally adaptable to your specific industry. What do you need to know? Who do you need to keep informed? Many customers add custom reports. All reports can be filtered by date, time and dollar amount. You can also save reports as an Excel™ spreadsheet or a PDF document. The sample below shows a typical list of military reports, custom built for the Air National Guard, U.S. Army, and U.S. Navy, used for tool sign out and log/register.



THE SOFTWARE TALKS... AND SCORES OF INDUSTRIES LISTEN EVERYDAY.

We don't just talk the talk. TCMax® works. In all kinds of applications across all kinds of industries, organizations and government agencies. TCMax is made to fit your needs. And we offer application-specific packages to maximize the fit. But the basic idea is the same – across the board. There is very little "adjusting" needed. So TCMax is up and running faster with minimal integration costs. Here are a few of the customers now using TCMax:

- **U.S. Army, Navy, Marines and Air Force**
- **Air and Army National Guard**
- **Defense/Aerospace Industries**
- **Aircraft Maintenance**
- **Facility Management**
- **Construction Industry**
- **Industrial Manufacturing**
- **Auto/Truck Manufacturing**
- **Transportation and Logistics**
- **Education and Institutions**
- **Correctional Facilities**
- **Utilities and Power Transmission**
- **Municipal and Government**
- **Infrastructure Development**
- **Medical/Research Facilities**
- **Hospitals and Health Care**
- **Fire/Rescue Departments**
- **Law Enforcement and Security**
- **Mining and Natural Resource Development**

(at right) United Launch Alliance utilizes TCMax software in assembly of Delta IV rockets. Since they started using the TCMax system there has been zero tool-related foreign object damage.

"The Delta launches have had no Foreign Object Damage (FOD) related to tool loss thanks to the tool accountability provided by the TCMax software suite."

Barry Esker – United Launch Alliance
