

LEVEL 5 TOOL CONTROL TOOL CONTROL SOFTWARE

SOFTWARE THAT TALKS!

Level 5 is Tool Control Software that talks, eliminating the need to repeatedly look at the computer screen between barcode scans.

It is the fastest, most accurate way to check tools in and out.

VOICE PROMPTS

Level 5 warns users with an audio prompt "Overdue Calibration", "Inspection Over Due" or "Caution: Tool Removed" then necessary. Plus it says "Issue", "Turn In", and "Enter Quantity" as appropriate to prompt the user. This one feature virtually guarantees 100% accurate asset tracking and tremendously speeds up the issue/turn-in process. In addition to the written cues and the audio prompts, each tool is displayed as a photo image – right on the screen.

NEW!

Displays item for visual identification in addition to audio prompts. See your Snap-on Account Manager for a Demo CD-Rom or for more information!

LABEL MAKER

Custom label making software is included with Level 5 that easily (really!) allows you to print your own barcode labels.

MANAGEMENT
TOOL CONTROL SOFTWARE

TOOL ACCESSORY

WHO'S IN CONTROL? YOU ARE.

Whatever control system you choose. You're the one who's in control. It's all about your operations, your staff, your needs. Our job is to listen, then recommend. Your Snap-on Factory Specialist has the experience. But the most important part is coming up with the right solution, a plan that fits your needs. Tools that always fit your needs. **That's the Snap-on difference.**

The Right People • The Right Answer • The Right Tools

L5CPP3	TCMAX 5 SEAT MOBILE POCKET PC LICENSE

Total Accountability Begins Here:

Installation: When installing from the demo CD, do not remove the CD until the installation places Level 5 TC Max[®] icons on your desktop. The installation process may force a reboot of your computer. This is normal. You must have speakers and a sound card to see how we have used audio to speed up and secure the process of issuing tools. 1) Click the top button to install TC Max itself. 2) Click the second button to install the Snap-on catalog and the pictures of Snap-on tools. The first time you run Level 5 TC Max it will warn you that you must select your printers. It will automatically open the maintenance/Preference dialog. There you will see the printers in the upper left corner. Select the appropriate printers then click the OK button at the bottom of the screen. Go to TC Max Readme for complete instructions. Within 10 minutes you will be a user.

To Order, Call The Snap-on Industrial Customer Service Center at 1-877-740-1900 or Contact Your Account Manager.
