TECHNICAL FOCUS

Show how to apply your diagnostic tool to solve common vehicle problems.

SOFTWARE SPOTLIGHT: SECURITY LINK

Security Link™ gives you access to OEM-secured vehicles

Security Link™, included with the latest diagnostic software release, provides access to special functions for FCAR (Fiat Chrysler Automobiles) and Ford® vehicles directly from a Snap-on® scan tool. Do you frequently work on these vehicles? If so, you need Security Link™. It ensures smooth vehicle systems access, efficient diagnostics and minimizes potential disruptions to maximize diagnostic tool capabilities and value.

Click below to learn more about Security Link™ and the added functionality that is available with the latest diagnostic software.

TAKE A LOOK

If we took the title above, it would easily fit into the question/answer format of the popular American daytime gameshow, Jeopardy!®. We'd most likely find the question under the category called "FCA" (Fiat®, Chrysler® Automobiles).

What is Proxi Alignment?

If we took the title above and had it easily fit into the question/answer format from the popular daytime gameshow, Jeopardy!®, we'd most likely find it under the category called "FCA", which stands for Fiat® Chrysler® Automobiles. The answer would be something like this: a programming process that allows modules or electronic control units (ECUs) to communicate with the vehicle.

What does proxi alignment mean?

On many original equipment manufacturers' (OEM) vehicles, when you replace a module like a body control module or an instrument cluster, you must do a procedure for the vehicle to recognize that the new module has been installed.

SOLUS+™: THE LATEST DIAGNOSTIC SCAN TOOL FROM SNAP-ON®

Already trusted by technicians worldwide, our SOLUS+ platform has been redesigned and upgraded to be the ultimate scan tool for everyday maintenance and repairs. With exclusive SureTrack® verified repair information and comprehensive coverage for domestic and imported vehicles and motorcycles, SOLUS+ provides all the sophisticated features you need to handle a broad range of diagnostic jobs. SOLUS+ – it's going to take your capabilities from day one.

Here are some of the features that set the Snap-on SOLUS+ apart:

- DSureTrack:** Speed up your diagnosis with access to SureTrack®, which delivers diagnostics experience and verified parts replacement records. Keep the odds on checking how other techs have been able to fix that issue before, giving you a head start on getting the job completed!
- DSide Touch Code Scan and Clear:** Quickly perform pro- and post-scan checks and complete full vehicle clear codes for all available modules on the vehicle.
- DDiagnostic Lookup:** Allows you to access OEM technical bulletins, specifications and notes.
- DCustom Data List:** Lets you customize the way you work, with custom data lists, freeze frame, PID writing, pending, stream, PID trigger, watchlist and custom functions.
- DI Get comprehensive OEM-specific automotive coverage:** for 40 domestic, Asian and European vehicles as well as motorcycle coverage* for the domestic, Asian and European makes.
- DSuper fast boot up:** SOLUS+ is ready to use in just two seconds with diagnostic results in as little as 30 seconds.
- DI Detailed trouble code definitions, test data, functional tests, relearns and adaptations.**
- DI Instant Vehicle ID:** automatically powers up and reads the vehicle ID when connected.
- DI Tests diagnosis and repair with powerful bidirectional controls** for operations such as injector balance, gauge sweep, motor dither, horn brake bleed and DPF.
- DI Embedded SMAP Operating System** dedicated to diagnostic functions for real-time operation.
- DI Automatically uploads vehicle system reports** via Wi-Fi to the Snap-on Cloud and allows you to access them from your phone or computer and print as mail or text from there.
