**Snap-on Industrial to Demonstrate Four Innovative New Products at SPE Offshore Europe**

Snap-on Industrial has been providing innovative tools, equipment and repair and toolkit solutions for over ninety years. New product innovation has always been at the heart of the business and at this year's SPE Offshore Europe exhibition in Aberdeen, Snap-on is launching a number of new products developed in response to their professional users' requirements. Visitors are invited to see a full demonstration on Stand No. 3B100.

The four new products being launched include:

- C-Tech torque wrench – allows torque in less time, with greater accuracy and control, uniting torque and angle in a single mode to provide the most accurate and fastest way to achieve torque while applying the right angle tightening sequence
- BK6500 & BK8000 visual inspection devices – this range of Digital Video Scopes allows professional users to see and record inaccessible areas in greater details than ever before
- Williams Tools At height – renowned for its quality, economy and productivity within the energy industry and which now addresses the safety issues of working at height
- Stainless steel tool storage - available in 304 and 316 gauge. Fully welded construction in brushed stainless steel finish. Available in standard or non-standard drawer sizes, the option of stainless steel gives long anti corrosion properties, ease of care and will maintain its aesthetically pleasing looks for many years ahead.

In addition, Snap-on will also be demonstrating the following:

- Snap-on Tools@Height the highly successful premium tool and retention system to enhance safe productivity whilst working at height or with restrictive access
- Snap-on Tools@Height safety training and education software
- Snap-on Hand & Power Tools, storage and productivity solutions
- Level 5 Tool control, including Networkable Tool Control and Automatic Tool Control in addition to TCMax (asset management system)

Eric Bright, Snap-on Industrial's Product Manager said: "Product innovation never stands still at Snap-on; we are constantly innovating to produce the next generation of tooling and productivity solutions. We have been attending SPE Offshore for many years but have never had the pleasure of launching such a diverse range of new products."

--ends--

**Notes to Editor:**

**About Snap-on Industrial**

Since 1920 Snap-on Industrial has been a world leading tooling solutions specialist with unrivalled expertise in providing bespoke solutions across a diverse range of industry sectors, which include

natural resources, defence, aviation, construction, as well as manufacturing, rail and food production. Snap-on Industrial provides companies with strategic advantages in addressing the challenge of increasing profitability, through reduced downtime, increased productivity and cost control.

Snap-on Industrial offers a range of programmes that benefit the professional user. The company is a leader in tool control systems for the prevention of Foreign Object Damage (FOD) and Foreign Material Exclusion (FME), with Level 5 ATC fully Automated Tool Control and Networkable Asset Management (NTC). In addition, Snap-on Industrial's TC Max provides a comprehensive audit trail and management control structure to asset management, providing a broader and deeper knowledge about an organisation's inventory usage and the operatives using them.

Additional programmes include Excellence in Education supporting apprenticeships and workplace training, Tools @ Height safety system which enables the safe tethering of virtually any hand or power tool from the company's portfolio without compromising functional or ergonomic performance.
