

WHAT WE PUT INTO IT HELPS YOU GET MORE OUT OF IT

Intelligent Diagnostics takes you through a logical workflow of filtered results

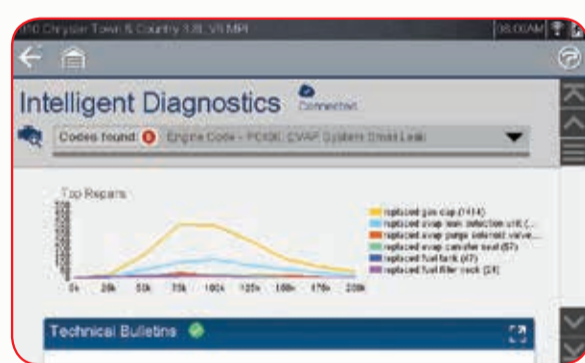

"Smart Data" saves you time by showing the most relevant PIDs for the job you are working on first

Full system pre- and post-scan in minutes, helping your customers understand the work you've done

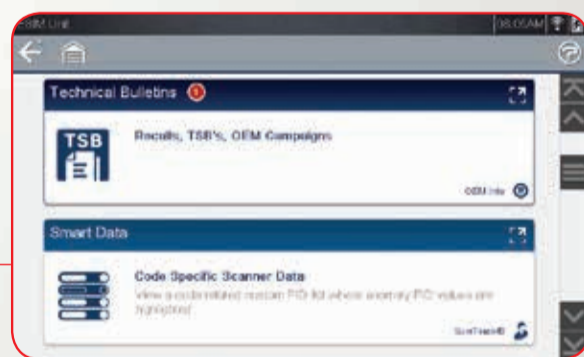

Whether you're looking for a diagnostic tool for yourself or your shop, you should look into the new TRITON-D8 with Intelligent Diagnostics. Its advanced features will save you time, boost your productivity and make you more money by guiding you to the problem – while filtering out unnecessary steps. It also broadens your coverage and capabilities, by quickly allowing you to verify component failures. And it's just the latest in the smartest, most intuitive diagnostic tools ever assembled.

INTELLIGENT DIAGNOSTICS, AN INTELLIGENT CHOICE.

The first Intelligent Diagnostics feature you'll notice is an ID card screen that gives you all the information you'll need in one scrolling, easy-to-navigate screen. It intuitively guides you straight through the diagnostic workflow, from pinpointing the problem to finding the fix.

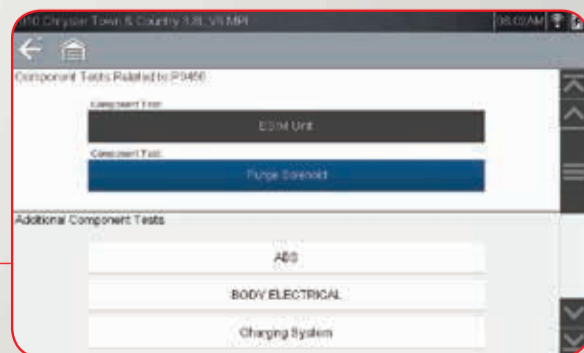

RELEVANT TECHNICAL SERVICE BULLETINS.
You'll save a huge chunk of time by accessing OEM TSBs for that code and that vehicle – all right on the tool and reachable within one simple click. Which makes it the ideal place to start your diagnosis.

THE SMART CHOICE FOR SMART DATA.

With built-in "Smart Data", TRITON-D8 automatically configures the display to show vehicle parameters (PIDs) relevant to the fault code. It saves you even more time by filtering out non-related data parameters.

SURETRACK® MAKES IT EVEN SMARTER.
TRITON-D8 gives you Top Repairs and Real Fixes from the specific vehicle and DTC – giving you access to information provided by thousands of expert technicians who've solved the same problem.

FUNCTIONAL TESTS AND RESETS.

You'll have functional tests and resets to verify component operation right at your fingertips – easy-to-follow reset procedures that help you complete the repair.

BUILT-IN SCOPE LETS YOU VERIFY COMPONENT FAILURE.

Its guided Component Test Meter pinpoints fault codes at a glance, helping you quickly identify the faulty component.

INTRODUCING TRITON-D8: THE LATEST ADDITION TO OUR INTELLIGENT DIAGNOSTICS FAMILY.

The platform's many exclusive features include:

- Scan for vehicle fault codes / diagnostic trouble codes (DTCs)
- SureTrack – Top Repairs and Real Fixes for the specific vehicle and DTC
- OEM TSBs specifically related to the vehicle and DTC
- "Smart Data" automatically configures the display to show vehicle data parameters (PIDs) relevant to the fault code. Non-related data parameters are filtered out, to save you time
- Highlights vehicle data that is out of expected range
- Functional tests to verify component operation; Reset procedures to complete the repair after component replacement. Only those that pertain to that fault code are shown
- Guided Component Tests, filtered to show those suggested relevant to the DTC
- Integrated multi-function tool with scanner, scope, meter and Guided Component Tests
- 5-second boot up and Instant Vehicle ID
- Pre- and Post-scan vehicle summary report displays a complete view of diagnostic results
- Links to the Snap-on cloud via altusdrive.com
- One-touch access to oil specs and service light reset functions
- SureTrack delivers diagnostic experience and verified parts replacement records
- High-speed 2-channel lab scope displays live signals for two waveforms in real time
- Powerful Peak Detect function grabs glitches, dropouts and ignition spikes
- Six megasamples/second captures high-speed details and faults other scopes miss
- Scale range: 0–100mV to 0–400V
- Sweep rate: 50 microseconds to 20 seconds (5 minutes in graphing meter mode)
- Exclusive vehicle-specific Fast-Track Guided Component Tests show how to test, where to connect and what results to look for
- Automatic meter configuration matches the selected test – or customize settings manually
- Test coverage for sensors, solenoids, injectors, charging/starting systems, ignition, motors, pumps, ABS and many more

INTELLIGENCE RUNS IN THE FAMILY
