

**VERUS[®] EDGE:
FULLY LOADED.**

DIAGNOSTICS, REPAIR, MANAGEMENT AND BEYOND

Snap-on[®]

INCREDIBLY FAST. IMPOSSIBLY THIN.

A secure, solid-state 64 GB hard drive and a Quad-core Intel® Celeron® processor (1.83 GHz, 2 GB RAM, 32-bit) that delivers boot-up from cold in about a minute and from Ready Mode in an incredible five seconds. The speed you need for maximum efficiency, with plenty of room to save all the data and applications you need to do the job. All in a slim, compact housing with a lot less bulk — and a lot more style.

A REVOLUTION IN DESIGN, POWERED TO PERFORM.

A thin, tablet-inspired design and a large, 10-inch, 1280x800 capacitive touchscreen display that's sensitive to your every gesture. Five hours of battery life, with days of standby power so you spend more time working and less time charging. More of what you need to see without squinting, searching or otherwise straining to get the job done — and your diagnostic tool never reaches its quitting time until you reach yours.

INTEGRATED DIAGNOSTICS IN A NEXT-GENERATION TOOL.

The onboard Diagnostic Software Suite provides integrated access to scanner, scope, component test, information and Technical Service Bulletins (TSBs) all from one location. The data manager allows you to save your customers' vehicle records, technician notes, scanner data and scope data. The onboard digital camera lets you take pictures for your repair records and save them to the internal hard drive — and connection to a printer is simple so you can give hard copies to your customers, helping you seamlessly navigate your way from start to finish.

EXCLUSIVE EXPERT RESOURCES BUILT RIGHT IN.

SURETRACK® *The industry's most comprehensive source of expert knowledge, with technician-verified Real Fixes and parts replacement records harvested from millions of successful completed repair orders.*

TROUBLESHOOTER *Gives you access to real-world experience with code tips, symptom tips and timesavers for faster, more confident repairs.*

FAST-TRACK® GUIDED COMPONENT TESTS *Show how to test, where to connect and what results to look for. Verify failed parts with certainty before replacing.*

**EVERYTHING YOU NEED,
ANYWHERE IN THE BAY.**

A built-in browser and Wi-Fi give you access to technical forums, parts suppliers, OEMs, your repair information system and other web resources whenever the job requires. The keyless, wireless scan module gives you access to OEM-specific coverage for over 40 vehicle makes and has access to codes, live data, functional tests, relearns and adaptations for dozens of vehicle systems. The high-speed four-channel hot-dockable scope and graphing meter give you a lightning-speed sample rate and glitch capture, meaning you always get to the right problem, fast.

Snap-on

MANAGES THE JOB AND THE SHOP.

OPTIONAL SHOPKEY® PRO REPAIR INFORMATION SYSTEM Access all the OEM service information to complete the repair. Powerful 1Search™ returns all results with a single lookup, including specs, repair procedures, maintenance information and the industry's most trusted color wiring diagrams.

VEHICLE HISTORY AND DATA MANAGER Stores thousands of vehicle records, customer data, vehicle ID, fault codes, repair notes and diagnostic results.

FACTORY-INSTALLED ANTIVIRUS SECURITY ESSENTIALS Multitask when you need to, without worrying about vulnerabilities.

RELIABLY BUILT. READY FOR ANYTHING.

The new, fourth-generation VERUS Edge: fully loaded with more vehicle coverage, more expert resources and more industry knowledge than any other full-featured diagnostic platform on the market.

Exclusive software suite provides one-touch selection for all diagnostic functions.

Guided component test procedures, live scope readings and known good waveforms side by side.

SureTrack gives you diagnostic experience, repair timesavers and verified parts replacement records harvested from millions of successful repairs.

Touch any live data parameter to display in graph text or full screen mode; view up to 16 data parameters on screen at once for true cause and effect diagnostics.
