New Snap-on VERUS[®] Wireless Diagnostic & Information System Offers Keyless Simplicity and Wireless Freedom

LINCOLNSHIRE, IL, Jan. 27, 2011 – Snap-on's new VERUS[®] Wireless Diagnostic & Information System is built to do it all, and do it fast. Never before has one tool allowed professional technicians to scan, scope and run the business from anywhere in the automotive repair shop. Get real world answers, including codes, data, functional tests, Fast-Track[®] guided component tests, technical forums, OEM websites and Troubleshooter, while moving freely around the vehicle. With Internet access and diagnostics now combined, the ability to improve productivity and increase profits is literally in your hands.

Features and benefits of the VERUS[®] Wireless Diagnostic & Information System:

- Simplicity - keyless scan module covers OBD-II applications with a single adapter, no need to switch keys per system
- Connectivity - use the built-in Wi-Fi and Internet browser to access technical forums, OEM websites or parts suppliers
- VERUS Wireless has long-range Class-1 Bluetooth[®] for wireless connection to the VERUS scan module throughout the shop
- Power - 250GB hard drive, 25 percent faster processor, more RAM and improved display screen
- Speed - get answers quick with one-touch icon navigation to jump between the Scanner, Scope or any function with the press of a finger
- Automatic Updater - web delivery of software service releases sent directly to the tool

"Ultimately, diagnostics isn't about finding problems, it's about providing solutions," said Mark Schaefer, director of marketing, Snap-on Diagnostics. "With Snap-on's new VERUS Wireless Diagnostic & Information System, technicians will get the answers that they need to complete their job up to 50 percent quicker, enabling them to get more done in less time."
