## **Snap-on Increases Coverage in Software Bundle 11.4**

**LINCOLNSHIRE, IL, Oct. 25, 2011** – Snap-on® scan tool customers significantly increase their service and repair capabilities with the extreme amount of coverage in the new Software Bundle 11.4. Professional technicians who use Snap-on Diagnostic platforms are more efficient and productive in the repair shop with 92,300 new and enhanced codes, tests, tips and data, plus added coverage that goes back to 1992 for all major vehicle makes, in addition to 2011 model year coverage. To put a measurement to this added coverage, Snap-on says that Software Bundle 11.4 gives technicians the ability to diagnose and repair more vehicles than can circle the earth six times!

“Whether the repair is driveability, undercar, transmission, diesel, body control or something else, technicians can ‘master the unknown’ in just about any vehicle repair with Software Bundle 11.4,” said Bill Bruno, vice president of sales and marketing for Snap-on Diagnostics. “With added coverage and more FastTrack Troubleshooter tips, our new software removes the need for guessing, helping customers to confidently and quickly diagnose and repair.”

Software Bundle 11.4 includes, but is not limited to:

- Honda Integrated Motor Assist (Hybrids)
- Ford Command Fan Module on Ford Engine
- Chrysler Park Assist
- Toyota and Nissan Cruise Control Systems
- Hyundai Power train Reset Functions
- Kia Body Control, Door and Window Module
- ABS Coverage for Subaru
- Body Control for Mitsubishi
- Newly added Smart Car Coverage with Optional European Software

“The additional coverage is always better with every update,” said Paul Peterson, RP Auto Tech & Diesel Performance in Rock Springs, WY. “To stay on top of the repair business, you have to have up-to-date equipment. Purchasing additional coverage keeps you there.”
