Snap-on's Software Bundle 11.4 Includes New Undercar Coverage

LINCOLNSHIRE, IL, Jan. 23, 2012 – With the new undercar coverage that's included in Snap-on's Software Bundle 11.4, professional service technicians don't need to venture into the unknown. The latest software provides the solutions needed to keep repair jobs in the shop and the knowledge to confidently diagnose customers' undercar problems.

Undercar coverage highlights in Bundle 11.4 include, but are not limited to:

- Honda Electronic Power Steering Sensor
- Chrysler Park Assist
- Toyota ABS Air Bleed
- GM Power Steering Control Module
- GM ABS Automated
- Kia Electronic Power Steering
- Kia Electronic Control Suspension
- Ford ABS Brake Bleed and Solenoid Tests

Undercar coverage features like Honda Electronic Power Steering Sensor affects over three million vehicles on the road, allows for quick diagnosing and is a must-have when the torque sensor is worked on. Software Bundle 11.4 makes it no longer necessary for a car to return to the dealer for something as simple as a Chrysler CAN vehicle park assist problem.

"Without the latest software from Snap-on, you cannot bleed the brakes on a Toyota. It's simply the fastest and best way to perform this procedure," said Chris Hockett, product manager for Snap-on Diagnostics. "With the new undercar coverage in Software Bundle 11.4, in addition to the undercar coverage from previous software releases, these features will make a technician's job easier and save shops time."

Software Bundle 11.4 includes new features and coverage, plus all of the features and coverage from the previous upgrades. Get over 92,300 new and enhanced codes, tests, tips and data, plus access to over 44,445 new systems for model years 1996 to 2011, including enhanced 2011 domestic and Asian coverage for General Motors (GM), Mazda, Infiniti, Lexus, Nissan, Scion, Subaru and Toyota. In addition, Software Bundle 11.4 offers over 5,700 component test meter (CTM) tips.
