Snap-on Tool of the Month: Quick Release Ratchets

KENOSHA, Wis. – November 9, 2010 – Snap-on’s Quick Release Ratchets (FR936 and SR936) are versatile and powerful, yet easy-to-use in any type of situation or condition, making them essential additions to any tool box.

“The main benefits of these durable ratchets are the simple-to-use button that allows the socket to be quickly removed from the ratchet,” said Mark Knapp, product manager for Snap-on. “Just press with your thumb and the socket is released; it is as easy as that. These quick release sockets are very helpful when your hands are dirty, greasy or wet and it is more difficult to pull off a socket.”

The 3/8-inch drive, 36-tooth (FR936) and 1/2-inch drive, 36-tooth (SR936) quick release ratchets are similar in construction to other Snap-on ratchets. Their patented design features high-tech seals and special O-rings to seal in permanent lubrication and seal out dust, dirt, moisture and other contaminants, for smooth-running ratchets without the responsibility of routine maintenance. Snap-on quick release ratchets also feature a push-button release in the center of the square drive for easy, one-handed socket removal.

Customers can find out more about the Snap-on Quick Release Ratchets (FR936 and SR936) by contacting their Snap-on representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
