## No More Broken Cam Gears with New Snap-on “Must Have” Cam Gear Holder

**KENOSHA, Wis. – October 23, 2013** – Replacing the cam gears on Chrysler® and Dodge® vehicles can be a challenging chore without the right tool. The new Snap-on® Cam Gear Holder (CGH1236) makes the removal and installation of cam gears both easy and accurate, resulting in fewer broken cam gears and faster repairs.

Simple to use, the new *Snap-on* Cam Gear Holder (CGH1236) features a hole at the center of the tool which allows a socket to be inserted for removal of the cam gear bolt. The CGH1236 fits 18 different models of *Chrysler* and *Dodge* cars, trucks, SUVs and vans, including 1995-2010 3.5 liter V6 engines and 2007-2011 4.0 liter V6 engines.

“Service technicians need a reliable holder when replacing cam gears on Chrysler and Dodge vehicles. Our new CGH1236 holds the hex at the gear hub, so the removal and torquing of the cam gear is simple and precise,” said Scott Amundson, product manager for Snap-on. “By eliminating broken cam gears and improving service turnaround times, the CGH1236 is a ‘must have’ tool for every tech.”

Customers can learn more about the new *Snap-on* Cam Gear Holder (CGH1236) by contacting their participating Snap-on franchisee or representative, visiting [www.snapon.com/handtools](http://www.snapon.com/handtools) or by calling toll free 877-SNAPON-4 (877-762-7664).
