New Snap-on Shallow Countersink Inverted Torx Sockets a “Must Have” to Engage Fasteners with Confidence

KENOSHA, Wis. – May 23, 2013 – Manufactured from special alloy steel and precision forged and heat treated for optimum strength and durability, the new Snap-on® 3/8-inch Drive Shallow Countersink Inverted Torx® Sockets (FLCE140, FLCE160, FLCE180) are a “must have” for every service technician looking to improve productivity and efficiency in the workplace.

“The FLCE Series Inverted Torx Sockets with a shallow countersink are designed for use on shorter Torx fasteners so you can properly engage the fastener with confidence,” said Scott Amundson, product manager for Snap-on. “These sockets are valuable additions to any Snap-on toolbox and service techs will save a lot of time and effort when they use them.”

The FLCE140 is ideal for connecting rod cap bolts on various Toyota® and Scion® vehicles, while the FLCE160 works perfectly on the cam sprocket of a 2.5L FB engine on 2011 and newer Subaru® Forester® vehicles, plus the camshaft timing gear assembly on various 2012 Toyota vehicles. The FLCE180 is the right choice when working on the spider gear of the rear differential on 2010 to current Chevrolet® Camaro® vehicles.

Customers can learn more about the new *Snap-on* 3/8-inch Drive Shallow Countersink Inverted Torx® Sockets (FLCE140, FLCE160, FLCE180) by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/handtools or by calling toll free 877-SNAPON-4 (877-762-7664).
