Drum Up More Business with Snap-on Reverse Input Drum Seal Sizer

Increase Efficiency with this Time-Saving Tool

KENOSHA, Wis. – December 8, 2008 – Not only does the Snap-on Reverse Input Drum Seal Sizer (#RIDS970) help insure proper seal installation in popular GM transmissions, it will also save service technicians time and effort because of the efficiency of the tool.

“By using the Snap-on Reverse Input Drum Sealer, service technicians can make a very challenging job much easier,” said Scott Amundson, product manager for Snap-on. “This tool was designed with service techs in mind in order to make this particular job less time consuming. Snap-on designs specialty tools to improve productivity and help service technicians save time on each job they perform.”

By using the Snap-on Reverse Input Drum Seal, tricky installation of reverse input drum and over stator shaft is simplified by pre-shaping the Teflon® seal with this special seal sizing tool. The Snap-on Reverse Input Drum Seal works on GM transmissions from 1982 to present such as 4L60, 4L60-E and 4L65-E automatic transmissions.

Customers can find out more about the Snap-on Snap-on Reverse Input Drum Seal (#RIDS970) by contacting their local Snap-on franchisee, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
