Snap-on Non-Marring Scraper Set Handles Tough Jobs, But Won't Hurt Soft Surfaces

KENOSHA, Wis. – December 2, 2008 – Snap-on's new five-piece, non-marring scraper set (PKN500) includes everything professional technicians, body shops and detailers need to safely remove adhesive, foam, moldings and emblems off of interior automotive surfaces, while eliminating the fear of scratching or gouging soft materials.

"Each tool in our new five-piece non-marring scraper set has a different tip to easily handle every scraping job that comes into your shop," said Bryan Hantke, product manager for Snap-on. "With curved and angled profiles, they are excellent tools for getting into tight spaces to loosen, clean and scrape. With Snap-on, techs have the power and control they need to get the job done right."

The five-piece, non-marring scraper set from Snap-on includes: 7/8" straight blade tool (PKN1); 1-1/4" straight blade tool (PKN2); 1-1/8" curved blade tool (PKN3); 3/4" angle blade tool (PKN4); 5/8" curved blade tool (PKN5); and a kit bag (CO100). The non-marring scraper set tools are made of glass-reinforced nylon for strength, are light weight and resistant to most automotive fluids. Popular "at home" applications include caulk, paint, and putty removal. This set is not recommended for use on windshields or other glass surfaces.

Customers can find out more about the five-piece, non-marring scraper set by contacting their local Snap-on franchisee, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
