Snap-on Tools – Tie Rod Bushing Socket (ITRS22)

Specific jobs often call for specific tools. The new Tie Rod Bushing Socket (ITRS22) from Snap-on Tools is made to use where a conventional socket won't fit – on Chrysler's LH platform found on the Chrysler LHS, Concorde and 300M as well as the Dodge Intrepid.

The socket's low-profile design makes it easy to install or remove the 7/8-inch or 22-milimeter hexagon head bolts that attach the inner tie rod bushing to the rack and pinion.

The chrome-plated socket provides technicians the best control with the power and durability they have come to expect with Snap-on and can't find with other brands.

Customers can find out more about the Tie Rod Bushing Socket by contacting their local Snap-on representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
