Snap-on's Aqueous Parts Washer Gives You Cleaner Parts with Less Effort

KENOSHA, Wis. – April 21, 2011 – Washing parts in the shop can be a tedious and laborious job. However, with Snap-on's Aqueous Parts Washer (PBC33A), you can experience cleaner parts with less effort while being more environmentally responsible.

"Our Aqueous Parts Washer offers the latest technology in aqueous cleaning systems," said Mike DeKeuster, product manager for Snap-on. "This environmentally responsible parts washer uses a tough, industrial-strength cleaning solution which is as effective as solvent-based chemicals. It also minimizes maintenance effort and provides a satisfying experience and pleasant working environment."

The Snap-on Aqueous Parts Washer (PBC33A) has the following features and benefits:

Clean Parts – Experience cleaner parts with less effort. Let the cleaning solution do the work and spend less time scrubbing with wire brushes compared to other solutions. The heated cleaning solution works effectively by relieving surface tension of the grime, doing more of the work for you. You will feel better when parts are restored to their like-new condition.

Less Maintenance – Cleaning solution lasts longer, minimizing bothersome solution changes and disposal requirements. Specially formulated solution does not absorb oil and dirt, while maintaining effectiveness and cleaning power. Cost-effective filtration system and internal oil skimmer captures contaminants, preserving the freshness of the cleaning solution.

Breathe Easier – Cleaning solution carries the Green Seal Certification mark and is certified by the South Coast Air Quality Management District. It is safer for your health and carries less VOC emissions. Your skin will also appreciate this as there are no harsh chemicals in the cleaning solution.

Environmentally Responsible – Take pride in owning a piece of equipment that carries the highest environmental certifications and lessens the environmental impact for generations to come, taking care of our land, water and air resources. The biodegradable, non-toxic water-based cleaning solution makes the PBC33A an environmentally responsible choice.

Customers can find out more about Snap-on's Aqueous Parts Washer (PBC33A), by contacting their Snap-on franchisee or representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
