Snap-on TPMS2 Keeps You Ahead of the Competition

KENOSHA, Wis. – February 24, 2011 – With over 50 million vehicles on the road today equipped with tire pressure monitoring systems (TPMS), service technicians are going to see an influx of TPMS work heading their way. However, without the right tools, potential business could be lost. With Snap-on's Tire Pressure Monitoring Tool (TPMS2), you will be taking the first step toward becoming the go-to place for TPMS service.

"Being able to service vehicles properly when the tire pressure warning light is illuminated is a great business-building opportunity for repair shops," said Mike DeKeuster, product manager for Snap-on. "Not only will shops benefit from being able to diagnose the culprit behind the warning light, they can also use the tool to aid in tire rotations and TPM sensor replacements. Having the right TPMS tool is imperative to take advantage of this growing business opportunity. With the Snap-on TPMS2, the technician can test for proper TPM sensor operation and relearn TPM systems by individual make, model and year. Having this capability is an indispensable tool if you are working on vehicles with TPM systems."

The Snap-on TPMS2 has the following features:

- Universal Sensor Coverage – diagnoses TPM sensors through the current model year
- Ease of Use – menu driven vehicle selection mode for quick and easy sensor activation
- Performs Vehicle-specific Relearn Procedures – includes PC Software to interact with TPMS2, providing specific TPM relearn procedures
- Access Sensor Information – provides sensor output data such as tire pressure and sensor IDs
- Bluetooth® Technology – allows communication between the TPMS2 and PC Software for information transfer (can also be accomplished with supplied USB cable)
- Ideal companion to Snap-on Diagnostic tools - complements the TPM capabilities of VERUS®, VERDICT™, MODIS™ and SOLUS PRO™

Customers can find out more about Snap-on's TPMS2 by contacting their Snap-on franchisee or representative, visiting www.snapon.com or by calling toll free 877-SNAPON-2 (877-762-7662).
