New Snap-on Welder a Powerhouse

No Limit on Performance with 110 Volt Wall Outlets

KENOSHA, Wis. – May 15, 2012 – A good number of shops have 110 volt wall outlets, limiting their choices when selecting a welder with power and performance. The new Snap-on® Welder (MIG140) is a solution for those shops that have limited power supply but demand high performance when it comes to their welder.

“With its innovative design, the new Snap-on MIG140 welder is the right equipment choice for those shops that want performance, durability and additional features but are limited to 110 volt power,” said Mike DeKeuster, category manager for Snap-on. “Versatile and easy to maneuver, the new Snap-on MIG140 welder is ideal for repair shops, body shops, as well as farm and metal fabrication shops. With a 60 percent duty cycle at full load, this welder allows you to weld thicker material for a longer period of time.”

The *Snap-on* MIG140 Welder features include:

- Welds 1/4-inch material in a single pass with 140A maximum output at 60 percent duty cycle
- All-copper wound transformer features Nomex® insulation and bolted laminations to provide precise voltage control and repeatable welds
- Capacitor bank and diode set delivers consistent voltage and industry-leading smooth-arc characteristics
- Wire feed assembly is constructed of precision machined cast aluminum which features all-metal gearing and powerful 800 in/min delivery for consistent wire speeds
- No need to purchase a welding cart as the MIG140 is complete with running gear along with a flow-meter/regulator
- Welds aluminum with optional spool gun and also TIG welds steel with optional accessories

Customers can learn more about the new *Snap-on* MIG140 Welder by contacting their participating Snap-on franchisee or representative, visiting www.snapon.com/shoptools or by calling toll free 877-SNAPON-4 (877-762-7664).
