## **Time is Money: New 10-Point Sockets for Honda Seat Tracks**

**KENOSHA, Wis. – June 11, 2013** – New 10-point fasteners are becoming more prevalent on certain vehicles. The new Snap-on® 1/4-inch Drive 8mm and 10mm 10-Point Sockets (DPTM8/DPTM10) for Honda® seat tracks are just the type of specialty tools that can increase performance as well as profits.

“We have developed great relationships with our customers and we receive many of our best product ideas from their feedback,” said Scott Amundson, product manager for Snap-on. “Our customers continually ask for more specialty tools to service Honda vehicles and they specifically requested help removing and installing front seat tracks. Technicians told us that without a proper tool, they were spending extra time trying to remove the seat fasteners and then had to use different fasteners to put the seat back into place. With our new 10-point sockets, techs will be able to complete this job more efficiently, saving valuable time in the service bay.”

### **Snap-on 1/4-inch Drive 8mm and 10mm 10-Point Sockets (DPTM8/DPTM10)**

- **Job:** Remove and install the front seat tracks on *Honda Odyssey*® and *Pilot*® vehicles.
- **Challenge:** Because two different 10-point fasteners hold the front seat track, removal and installation of fasteners are time-consuming without a specialty tool.
- **Solution:** DPTM8 and DPTM10 8mm and 10mm sockets are specifically designed for this application so the job can be completed quickly.

Customers can learn more about the new *Snap-on* 1/4-inch Drive 8mm and 10mm 10-Point Sockets (DPTM8/DPTM10) for *Honda* seat tracks by contacting their participating Snap-on franchisee or representative, visiting [www.snapon.com/handtools](http://www.snapon.com/handtools) or by calling toll free 877-SNAPON-4 (877-762-7664).

### **About Snap-on Tools**
