## **Time is Money: New Snap-on Parking Brake Tool for Toyota Vehicles**

**KENOSHA, Wis. – March 13, 2014 –** For service technicians, every minute counts. The new Snap-on® Parking Brake Tool (BT20) saves at least 20 minutes on average when working on rear parking brake springs on many Toyota® vehicles.

“In the automotive service and repair business, time is money,” said Scott Amundson, product manager for Snap-on. “We work very closely with our customers to provide them with tools that help increase productivity and profitability. The time saved by using the BT20 on Toyota vehicles can be put toward completing another job in the service bay.”

Repairing the parking brake on Toyota vehicles requires a smaller brake spring tool with more reach. Removing and installing the brake shoes can be a difficult task because technicians need to turn a small shoe hold down spring cup in an area with limited access. The new [Snap-on Parking Brake Tool \(BT20\)](#) features a special tip designed to engage the shoe hold-down spring cup so the brake job can be completed accurately and efficiently on model year 2000 and newer Tacoma®, Tundra®, FJ Cruiser®, 4Runner®, Land Cruiser® and Camry® vehicles.

Customers can find out more about the *Snap-on* Parking Brake Tool (BT20) by contacting their participating Snap-on franchisee or representative, visiting [www.snapon.com/handtools](http://www.snapon.com/handtools) or by calling toll free 877-SNAPON-4 (877-762-7664).

### **About Snap-on Tools**

Snap-on Tools is a subsidiary of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks.
