Snap-on brightens up your workspace with new rechargeable shop light *Quick charge offers up to 6 hours of light*

KENOSHA, Wis. (July 6, 2015) – Get out of the dark and brighten up your workspace with the new Snap-on® ECFBAR300 Rechargeable Shop Light. With an innovative Chip-On-Board LED, efficiently delivering more light while maximizing battery power, this powerful shop light is ideal for use under hood, under car, in the trunk or anywhere else requiring additional, reliable lighting.

“There is nothing more frustrating than having the batteries die on your shop light while working on a project,” says Mark Ganey, product manager of shop and tech tools for Snap-on. “The ECFBAR300 is rechargeable, eliminating the need for supplemental batteries. With three- and six-hour runtimes, depending upon the choice of high or low setting, this shop light keeps the work area bright for various projects in countless locations.”

Equipped with a 3.7V Lithium Ion Battery and a compact AC charger, the ECFBAR300 requires only two hours of quick-charge time. Its output of 300 lumens on the high setting and 160 lumens on the low setting maximizes the view of any work setting.

“This light is the perfect shop light. Customers have the option to adjust the brightness with the two-position switch, which extends the runtime to accommodate any project need. And the rugged aluminum body makes it a really durable, long-lasting product,” says Ganey.

The ECFBAR300 is available in three colors—orange, green and red—and has a color-coordinated hanging hook for work, storage or charging. Customers can learn more about the new Snap-on® ECFBAR300 Rechargeable Shop Light by contacting their local Snap-on franchisee or representative, visiting www.snapon.com or calling toll free 877-SNAPON-4 (877-762-7664).
