PRO-LINK Ultra Cummins Software Features Expanded Engine Coverage

KENOSHA, Wis. (July 18, 2017) – The new Snap-on® EEHD867003 PRO-LINK® Ultra Cummins® Engines v. 2.0 software is the newest addition to the PRO-LINK Ultra Diagnostic System. The PRO-LINK line is a heavy-duty diagnostics system that assists technicians in diagnosing heavy-duty vehicles, allowing technicians to pinpoint the problem, saving valuable shop time. The system reads active/inactive faults, clears faults, and provides engine and after-treatment support and data.

“Technicians can quickly and efficiently troubleshoot, and perform a variety of diagnostic tests on Cummins engines from EPA 2007-current using the EEHD867003,” said David Shock, a Snap-on product manager. “The 2.0 version of the software includes several new features, including proprietary fault and data point descriptions, DPF history, and the ability to change max vehicle speed.”

Special tests have been added to the 2.0 release, including AFT maintenance and history and the option to reset trip information. Additionally, several other special tests are still supported by this release, including the AFT DEF system leak test, the AFT DPF regeneration test, the AFT SCR performance test and the ATF shutoff valve and injector override test.

Programmable parameters have also been added, including the ability to change maximum cruise control speed, change maximum vehicle speed, enable/disable cruise control and idle shut down timers. The PRO-LINK Ultra Cummins Engines v. 2.0 will make diagnosing Cummins electronic engines easier and faster.

Find out more about the new Snap-on PRO-LINK Ultra Cummins Engines v.2.0 by contacting your participating Snap-on franchisee or other representative, visiting www.snapon.com or calling toll-free 877-SNAPON-4 (877-762-7664).

About Snap-on Tools

Snap-on Tools is a subsidiary of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks. Products and services include hand and power tools, tool storage, diagnostics software, information and management systems, shop equipment and other solutions for vehicle dealerships and repair centers, as well as for customers in industries, including aviation and aerospace, agriculture, construction, government and military, mining, natural resources, power generation and technical education. Snap-on Tools is one of the largest non-food franchise companies in the world, selling its products and services through franchisee, company-direct, distributor and internet channels. Snap-on Incorporated, which was founded in 1920, is a \$3.4 billion, S&P 500 company located in Kenosha, Wisconsin, with operations throughout the world.
