## **New Snap-on Plasma Arc Cutting Machine Packs Power into a Portable, Lightweight Unit**

**KENOSHA, Wis. (Feb. 21, 2017)** – Adept at handling a variety of jobs without sacrificing performance, the new Snap-on® PLASMA20i Plasma Arc Cutting Machine is a great addition to body shops, mobile truck repair businesses and general fabricators. While the small, 22-pound unit allows for lightweight portability in the shop or on the job site, the Plasma Arc Cutting Machine packs plenty of power. It offers an adjustable amperage range from five to 20 amps and accepts 115-volt input power supply at minimum current requirements.

“This is the transportable solution so many professionals need in a plasma arc cutter,” says Snap-on product manager Mike DeKeuster. “The PLASMA20i is ideal for a variety of ferrous, non-ferrous and high strength materials. Even with its compact size, it’s powerful enough to cut up to ¼” thickness, and the adjustable amperage makes it easy to lessen distortion when working on thinner materials.”

For applications such as panel removal around spot welds, the plasma cutter adjusts cut depths to the top layer of material without disturbing the base layer, so technicians save valuable time.

The PLASMA20i package also contains an air filter and pressure regulator, so technicians can choose a nitrogen air supply or compressed air supply, making it extremely handy on-the-go in environments where compressed air might not be available.

Find out more about the new Plasma Arc Cutting Machine by contacting your participating Snap-on franchisee or other representative, visiting [www.snapon.com](http://www.snapon.com) or calling toll-free 877-SNAPON-4 (877-762-7664).

### **About Snap-on Tools**

Snap-on Tools is a subsidiary of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks. Products and services include hand and power tools, tool storage, diagnostics software, information and management systems, shop equipment and other solutions for vehicle dealerships and repair centers, as well as for customers in industries, including aviation and aerospace, agriculture, construction, government and military, mining, natural resources, power generation and technical education.
