SNAP-ON MOBILE TOOL SOLUTIONS

QUALITY TOOLS, WHEN AND WHERE YOU NEED THEM.
YOU PICK THE TIME.
YOU PICK THE PLACE.
You’ve suddenly got a job on the other side of the world.
You need tools, and you need them now. Maybe it’s oil
field maintenance, a construction job, a disaster. A place
where the only map is your GPS coordinates. At Snap-on,
we understand. Better yet, we know what to do. Snap-on
Mobile Tool Solutions are there for you. With real answers,
that really work. Right now.

THE TOOLS FOR THE JOB
Snap-on makes over 50,000 (?) hand tools and power tools.
And we know exactly how to apply them. We’ll come up
with the right mix of tools, put them in the right 20 or 40
foot mobile containers and get them to the job. The tools,
the storage and control systems, cabinets and cupboards
and all the electrical, right down to lights, heat and air
conditioning – even the personnel, if required. A complete
custom, turnkey mobile tool crib. When and where you
need it.

THE TOOLS TO KEEP
THEM ON THE JOB
Tool losses can be huge at a remote work site. And it can
cost you big time. No one does more to reduce these losses
than Snap-on. We’ll create a totally controlled environment,
managed by our superior Level 5 Tool Control System.
It’s the total package from CAD tool control layouts and
electronic keyless entry systems to sophisticated database
management systems for advanced tool tracking. With
Snap-on Mobile Tool Solutions, it’s all under control.

OUR SOLUTIONS FIT
AS WELL AS OUR TOOLS
We can set up a program any way you want. Lease, rent
or purchase. All tailored to your needs, your mission, your
financial structure.
RAISING PRODUCTIVITY.
LOWERING COSTS.

It's all about having the right tools, ready when you need them. That's what Snap-on is all about. There isn't an application we haven't seen and solved. And our tool control systems insure that the tools will be there, in their proper place, when your people need them. That's productivity. That's Snap-on.

PROVEN.
ALL AROUND THE WORLD.

This isn't just an idea. It's a program with proven results.

We've gone to the Caspian Sea with Rolls Royce Power & Energy with multiple pump units and container workshops. All up and running faster than promised. With only six tools unaccounted for since the beginning of the project back in 2003.

We've been to the mountains in Chile with Collahausi Mining with everything from mobile cribs to asset management to training. And a loss prevention program that cut tool losses from 50% to less than 5%.

Just two examples. With proven results and real savings in both time and money.
Who’s In Control? You Are.
Whatever control system you choose, you’re the one who’s in control. It’s all about your operations, your staff, your needs. Our job is to listen, then recommend. Your Snap-on Factory Specialist has the experience. But the most important part is coming up with the right solution, a plan that fits your needs. Tools that always fit your needs. That’s the Snap-on difference. The Right People • The Right Answer • The Right Tools

Snap-on Mobile Tool Solutions work. Because we always have someone there to make sure they work. A local Snap-on Solutioneer familiar with the region, the job, the mission. We’re there to help deploy, train and service the program. Every step of the way. At Snap-on, it’s the only way.

CUSTOM MOBILE TOOL CONTROL
OUR TOOLS ARE THERE. OUR PEOPLE ARE THERE.
